— INSIDE

In this *guide*

01	The product About BEWON, the engine, six services	05
02	Reading a signal Anatomy, the chart, grades and risk	08
03	Coverage & alerts Twenty-two markets, daily rhythm, 3% alerts	11
04	The website Eight pages, open records, demo	14
05	Trust, start & share Security, first week, share kit, links	18
06	The platform today Every service, shown on desktop and mobile: exchange, bot, gold, Web3, news, earning online	24

Explain it accurately, state the risk, never promise a profit.

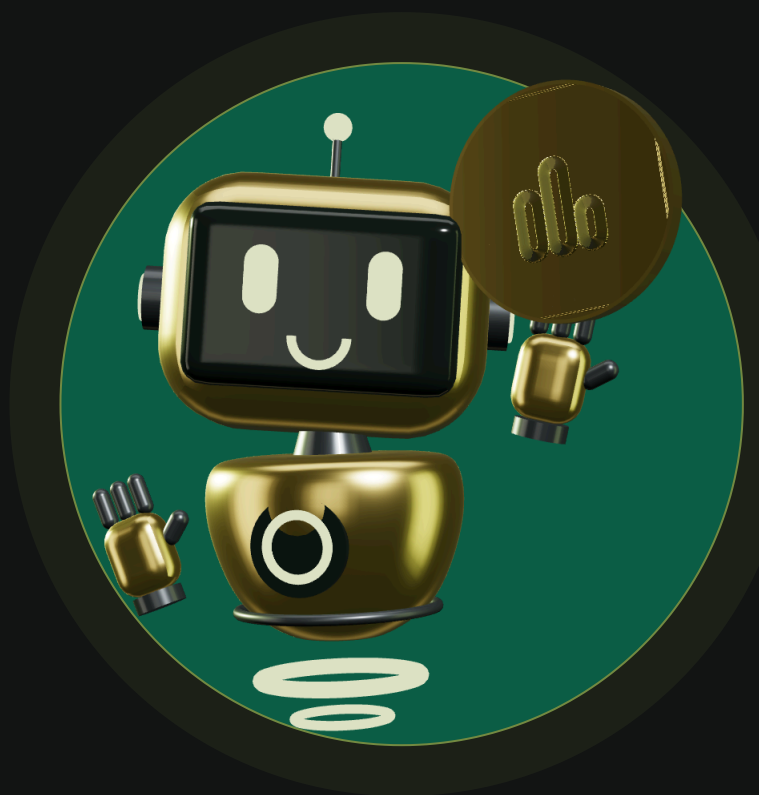

THE ONE RULE BEHIND EVERY PAGE

— ABOUT US

Honest market analysis, *free for everyone*

BEWON Signals is an independent project from BEWON Network, built and run in Bangladesh. It began as a single Telegram bot on free GitHub servers. Today it is a full signal engine with Forex and Gold coverage, a live website, a news portal and a practice account.

We started it because most "signal groups" sell hope: hidden track records, paid VIP tiers and promises of guaranteed profit. We wanted the opposite — a tool that shows its reasoning, publishes every result and costs nothing.

Our mission

Make rule-based, transparent market analysis available to anyone with a phone — at zero cost.

Our vision

A trading community that decides with information and discipline, not hype.

“If a signal service won't show you its losses, it isn't showing you the truth.”

— WHAT WE STAND FOR

Four principles, *no exceptions*

01

Transparency

Every signal, every result and every rule is public. Wins and losses stay on the record.

02

Free access

Market analysis should not sit behind a paywall. BEWON costs nothing and never will.

03

Education first

We explain why a setup qualifies, so people learn to read markets — not just follow calls.

04

Responsibility

No profit promises, no custody of funds, no pressure. Risk is always stated clearly.

22

Markets tracked

18 crypto + 4 Forex & Gold

96

Scans a day

One every 15 minutes

6

Automated services

Signals, alerts, digest...

\$0

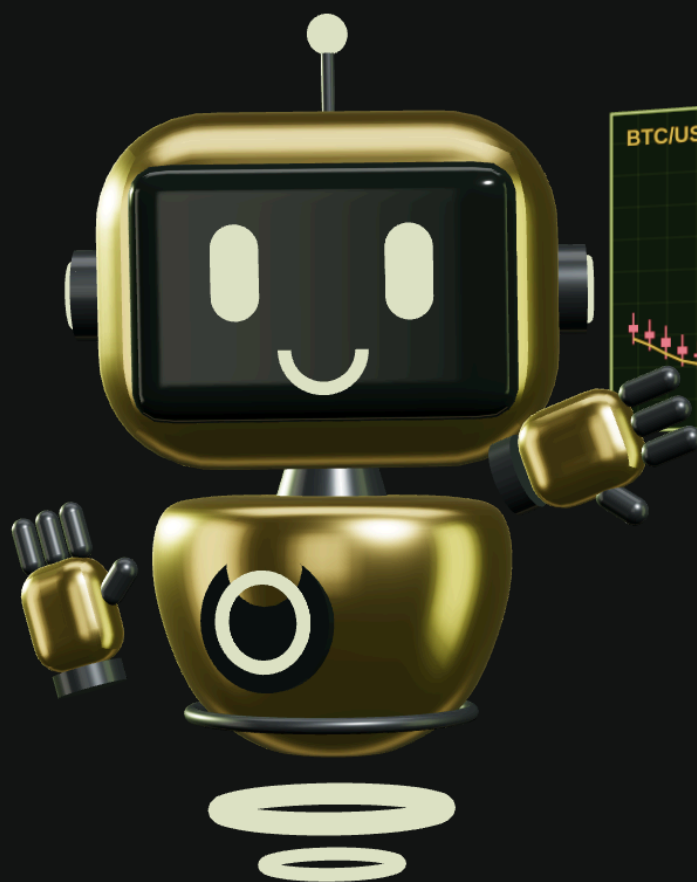

Cost to you

No fee or deposit

01

The *product*

A rule-based engine that reads live markets, scores every setup and delivers it — while every decision stays yours.

— HOW IT WORKS

Market data in, *a notification out*

Live market data

Public prices from Binance (fallback OKX, KuCoin, Kraken) and Yahoo Finance. Read-only.

Analysis

EMA 9/21, RSI 14, MACD, ATR, ADX and volume on every pair.

Score and levels

0–95% confidence, a grade, entry, two targets and a stop.

Delivery

Telegram channel and website, with the reasoning attached.

You decide

There is no order step — the engine has no exchange account.

Why this matters

Same inputs, same output — every time. That is why each signal shows its reasons, a grade and clear levels instead of a bare "BUY".

WHAT YOU GET

Six services. *All free.*

01

Crypto signals

EMA cross + RSI on 1h candles, scored on trend, EMA 200, MACD, ADX, volume and BTC.

02

Forex & Gold

EUR/USD, GBP/USD, USD/JPY, XAU/USD — Monday to Friday, targets in pips.

03

Volatility alerts

Any coin moving 3% inside 30 minutes triggers a heads-up.

04

Crypto news

Headlines from five major outlets, on site and in Telegram.

05

Daily digest

8 AM daily: prices, changes, Fear & Greed, win rate.

06

Result tracking

TP1 moves the stop to entry; every outcome stays public.

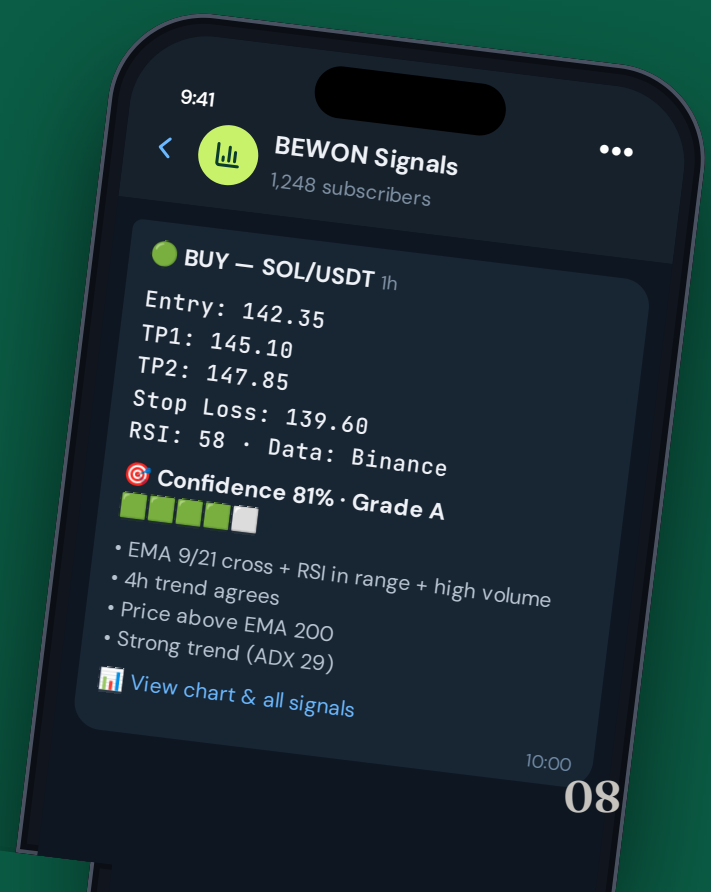

One channel, one website, zero subscriptions.

02

Reading a *signal*

Every alert explains itself — the levels, the score, the grade and the reasons behind them.

ANATOMY OF A SIGNAL

Not a BUY label — *the full reasoning*

1

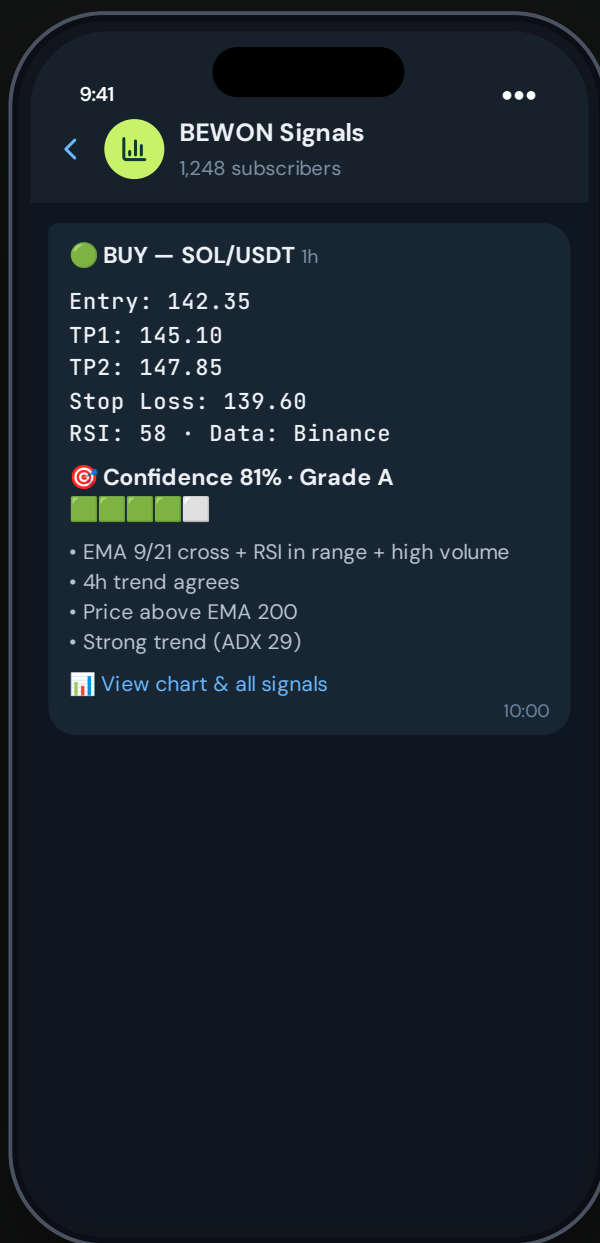

Reference levels

Entry, two targets and a stop
— sized with ATR.

2

Confidence + grade

How many filters agree, 0–
95%.

3

The reasons

Every factor that passed or
warned.

4

Live chart link

One tap opens the coin's
chart.

A low score is never posted

Setups below 60% confidence are filtered out. A score is not a win probability.

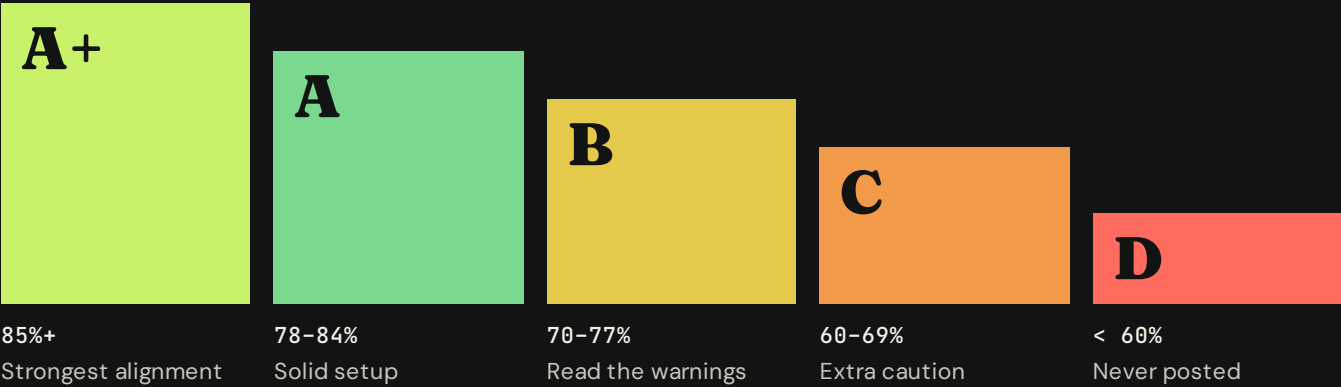

FROM CHART TO SIGNAL

How a setup *qualifies*

FIG. EMA CROSSOVER, RSI CHECK, THEN ATR-BASED LEVELS (STOP 1.5×, TP1 1.5×, TP2 3×)

READING THE GRADE HONESTLY

A grade is not a win probability.
Markets are volatile; targets may be missed and losses are possible. BEWON gives no financial advice and guarantees no profit.

03

Coverage *& alerts*

Twenty-two markets watched around the clock — plus a separate monitor for sudden moves.

THE WATCHLIST

Twenty-two markets in, *two* channels out

t.me/all_crypto_signals

Website

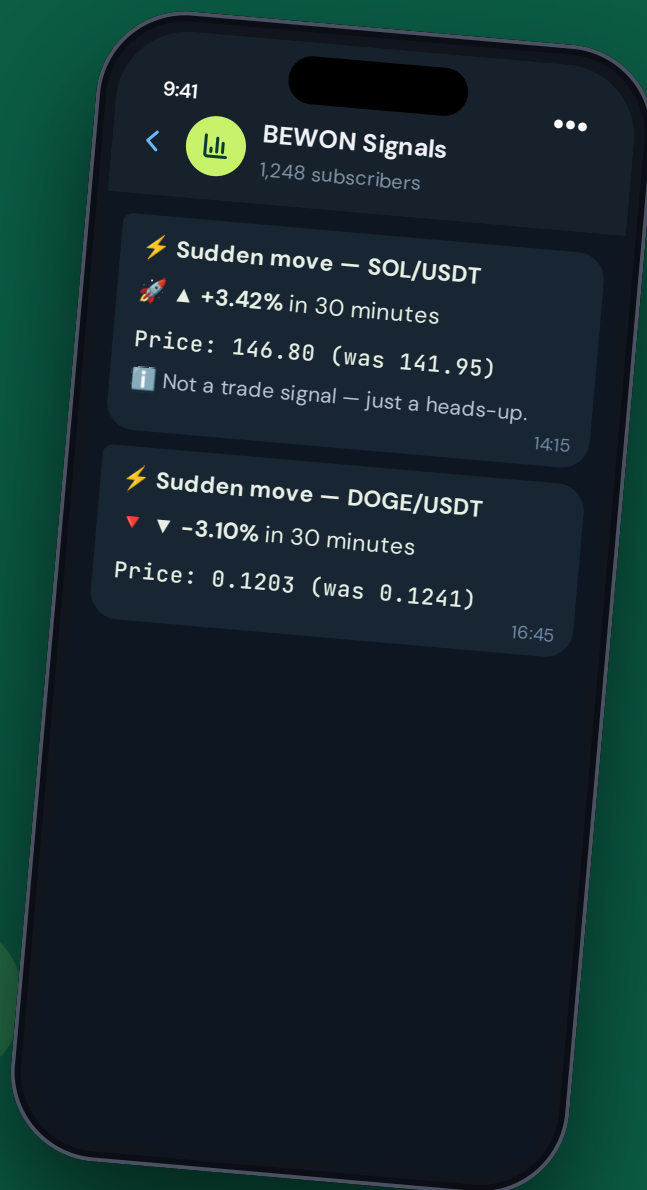

Live prices, charts, full history and demo.

bewonnetwork.github.io/crypto-singals

VOLATILITY ALERTS

A sudden move? *Know right away.*

A separate monitor checks every coin's 5-minute candles, every 15 minutes.

**30-minute window**

Now vs. 30 minutes ago.

**3% threshold**

Up or down.

**One-hour cooldown**

No repeats per coin and direction.

**A warning, not a signal**

No entry, target or stop.

04

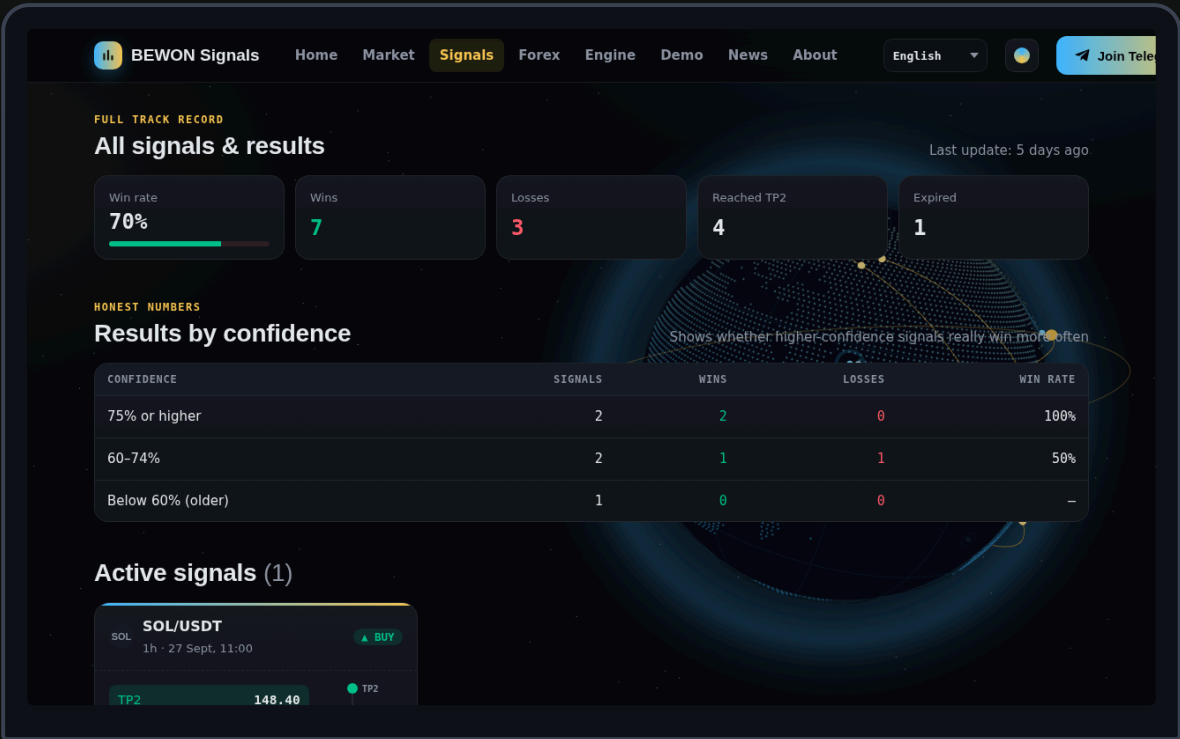

The website

Eight pages, a practice account and every result in public — in 20 languages and 8 colour themes.

SITE MAP

Eight pages, *one tap away*

OPEN RECORDS & PRACTICE

Check the record. *Then practise.*

Every result is public

Entry, targets, stop, outcome and confidence for every signal. Nothing is deleted.

[See the record ↗](#)

Practise with play money

10,000 demo USDT at live prices, a 0.1% fee and a trade journal. No real money in or out.

[Open the demo ↗](#)

MADE FOR EVERYONE

Your language, your colours, *any screen*

20

Languages

Bangla and English are written by our team; eighteen more use Google's automatic translation.

8

Colour themes

One tap repaints buttons, charts and the 3D world — and the choice is remembered.

2

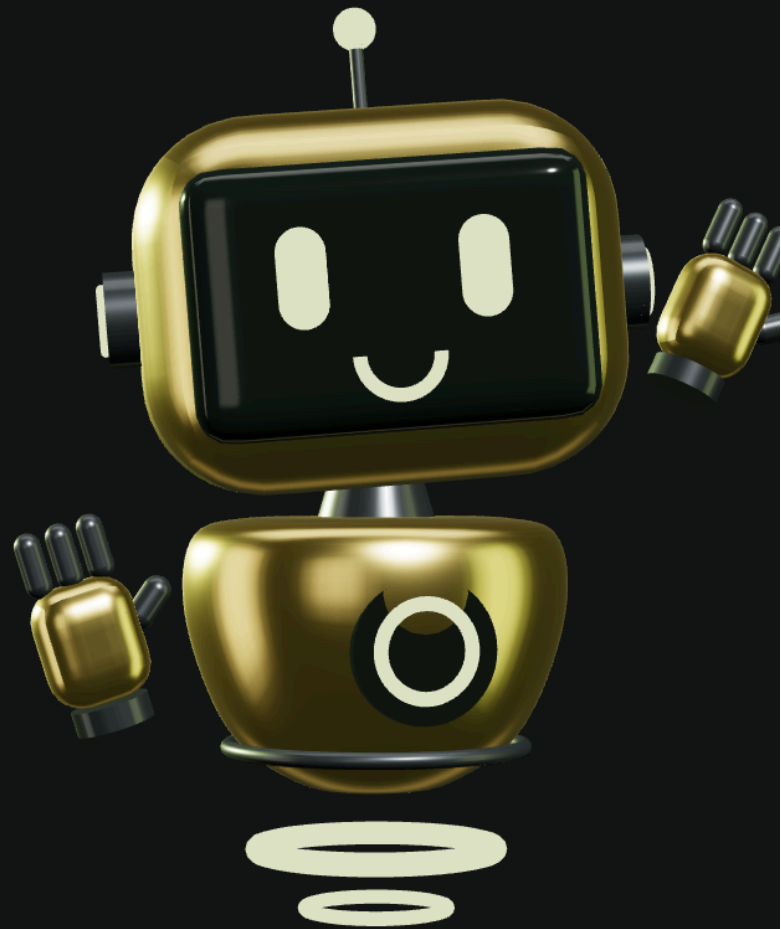

Screens, one site

Full layout on desktop; bottom navigation and one-hand use on mobile. Add it to your home screen and it opens like an app.

05

Trust, start & share

Nothing of yours is ever at risk. Your first week takes ten minutes a day. And when you share it, share it honestly.

SECURITY

Nothing of yours *to put at risk*

No API keys

Never asks for exchange keys, seed phrases or withdrawal rights.

Public data only

Reads open market data; never touches your account.

No money involved

No deposit or payment — ever. An account is optional and free.

Full public history

Every signal stays on the site, win or loss.

Open rules

No secret 'AI' — clear EMA, RSI, MACD, ADX rules.

Runs by itself

Free GitHub servers, 24/7.

“It never asks for your password or your money. If you don't like it, just leave the channel.”

SAY IT LIKE THIS

BEWON is *not*

✗ a managed fund

✗ an investment product

✗ financial advice

✗ a guaranteed win rate

✗ an income scheme

— GETTING STARTED

Six steps, *then seven days*

- 1

Join the channel
Open t.me/all_crypt_signals and tap Join.
- 2

Turn on alerts
Keep notifications on.
- 3

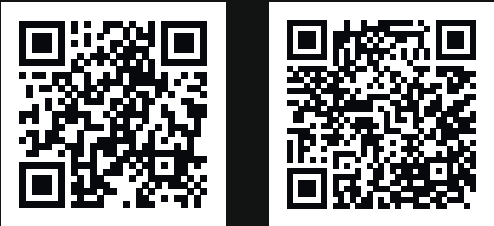

Save the site
Bookmark or add to home screen.
- 4

Practise in demo
Test signals with play money.
- 5

Learn to read
Entry, TP, SL, grade, reasons.
- 6

Decide yourself
Stop loss, small size, your call.

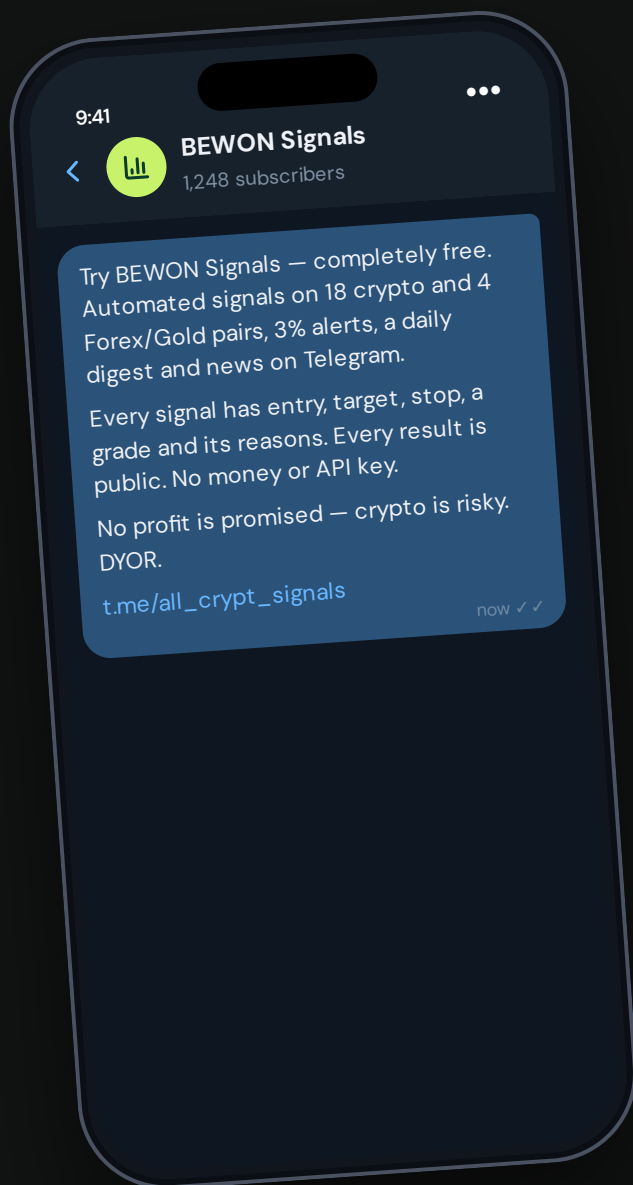

DAY 1	DAYS 2-3	DAYS 4-5	DAY 6	DAY 7	ONGOING
Get oriented	Read five signals	Test in demo	Keep a journal	Review results	Repeat weekly

Scan to begin
Left: Telegram channel · Right: website.
We suggest a week of demo practice before trading real money. Not financial advice.

— SHARE KIT

Tell your friends — *honestly*

CAPTION A

I stopped refreshing charts every hour. BEWON watches 22 pairs and sends the setup, grade and levels to Telegram. Free. Not financial advice.

CAPTION B

Signals that explain themselves: trend, momentum, volume, ADX and an A+–C grade. You decide every trade. Free.

CAPTION C

New to trading? Practise with play money in BEWON's demo first. No money needed.

✓ Do

- ✓ Say it is a free signal service
- ✓ Use current facts only
- ✓ State that losses are possible

✗ Don't

- ✗ Promise profit or a win rate
- ✗ Spam strangers or use bots
- ✗ Ask for money or passwords

QUESTIONS YOU WILL BE ASKED

Short, *honest answers*

1

Does it trade for me?

No. A signal never places an order, and no password or API key is ever requested.

2

How much will I make?

Nobody can tell you that — be sceptical of anyone who does. It is an analysis tool, not an income product.

3

Why is it free?

It runs on free GitHub servers. There is no charge, subscription or commission.

4

How do I know it works?

The full history and win rate are public on the Signals page. Check before you join.

5

Too many messages?

Only setups above 60% confidence go out; alerts have a one-hour cooldown.

6

Is it 'real AI'?

No black box. Clear technical rules on real market data, with reasons on every signal.

7

How do I stop?

Leave the channel. There is no account and nothing to delete.

The one answer to remember

If someone asks "how much will I make?", the honest answer is: nobody knows.

23	All services & TestScan	48			

About the screenshots

Screens were captured from the BEWON site in English. Prices and balances in them are examples. Balances on trading screens are practice money, not real funds.

HOME

One screen, *the whole market*

The front page shows what matters first: where the market is, what the bot is doing and where to go next.

01 BTC dominance bar

Bitcoin, Ethereum and all other coins as a share of the total market, with today's change.

02 Auto-trade card

The practice bot's wins, losses and result, visible without opening another page.

03 Live price strip

Major coins with their 24-hour change, refreshed while the page is open.

04 Quick links

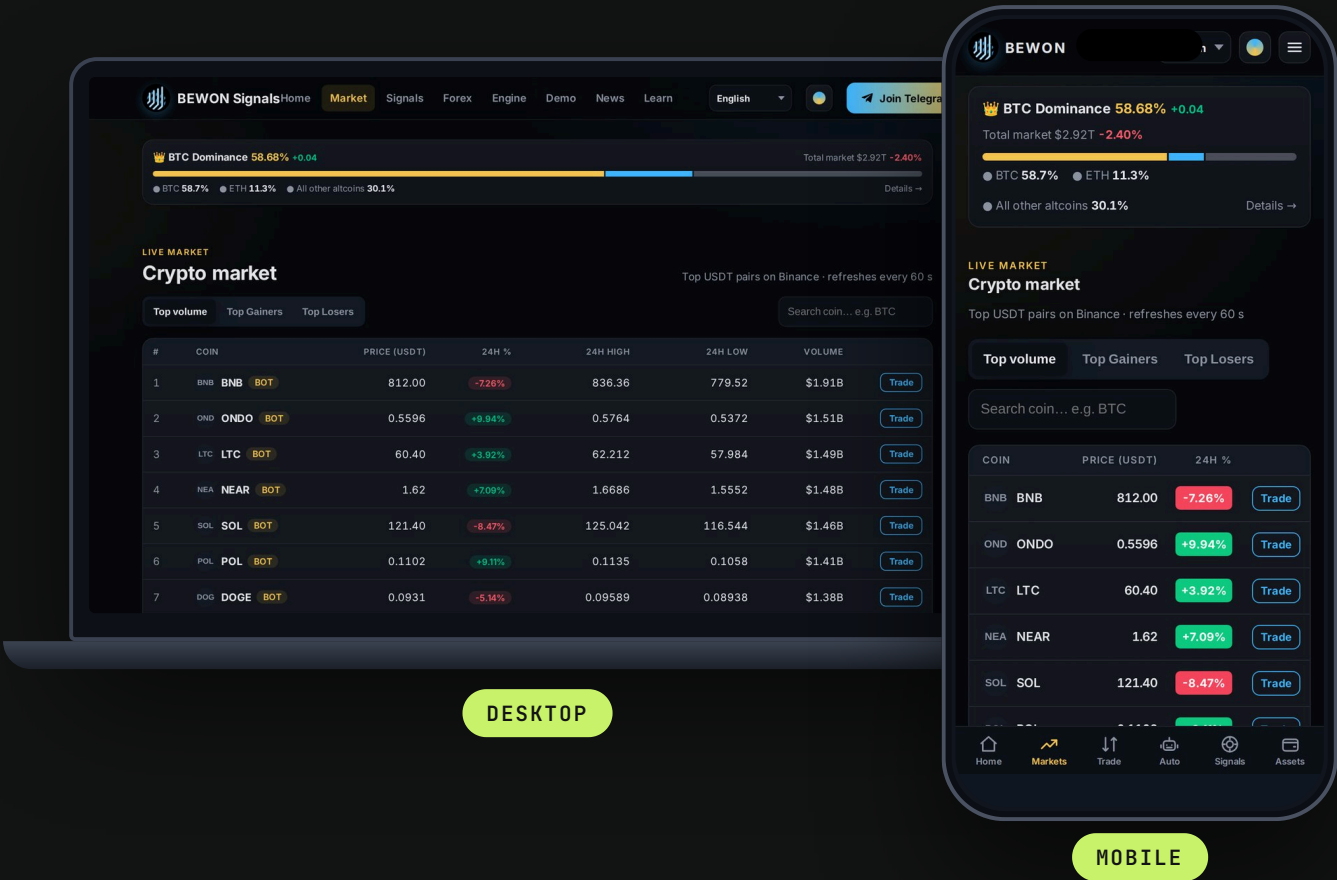

Telegram channel, signals, training and this guide, one tap away.

[OPEN THE HOME PAGE ↗](#)
bewonnetwork.github.io/crypto-singals/#/

MARKET

Live prices for *every major coin*

A live table of the top USDT pairs, sortable and searchable, refreshed every 60 seconds.

01 Top volume, gainers, losers
Three tabs to see where the money is going today.

03 24h high, low and volume
The day's range next to every price, in one row.

02 Search any coin
Type a symbol such as BTC or SOL and jump straight to it.

04 Trade in one tap
Each row opens the practice trade screen for that coin.

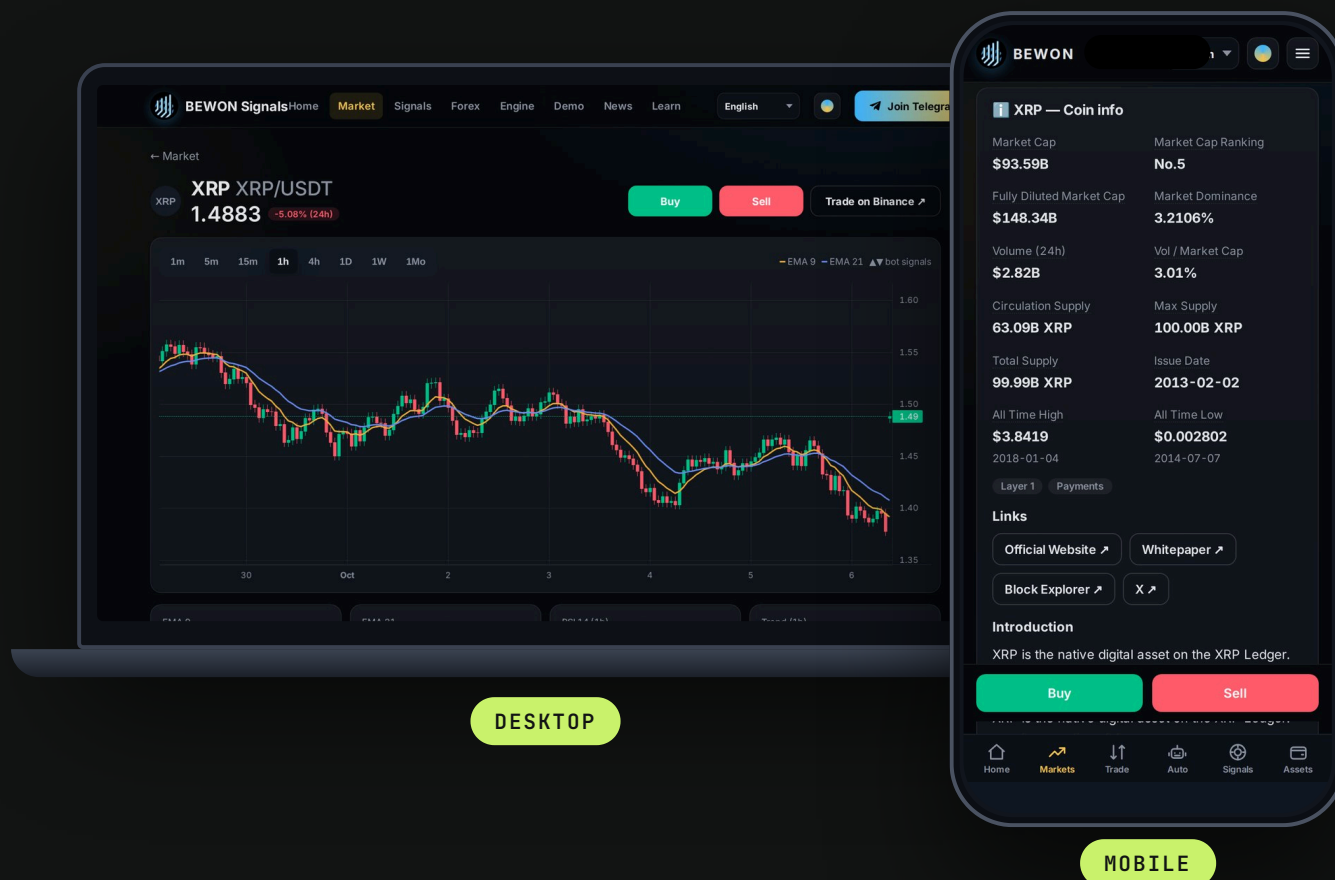

OPEN THE MARKET ↗

bewonnetwork.github.io/crypto-singals/#/market

COIN PAGE

Charts and facts *for each coin*

Every coin has its own page: a candle chart with indicators on top, the coin's key numbers underneath.

01 Eight timeframes

1m, 5m, 15m, 1h, 4h, 1 day, 1 week and 1 month candles.

02 EMA, RSI and trend

EMA 9 and 21 on the chart, with RSI and the 1-hour trend below it.

03 Coin info

Market cap, FDV, supply, all-time high and low, issue date and category.

04 Official links

Website, whitepaper and block explorer, plus a short introduction.

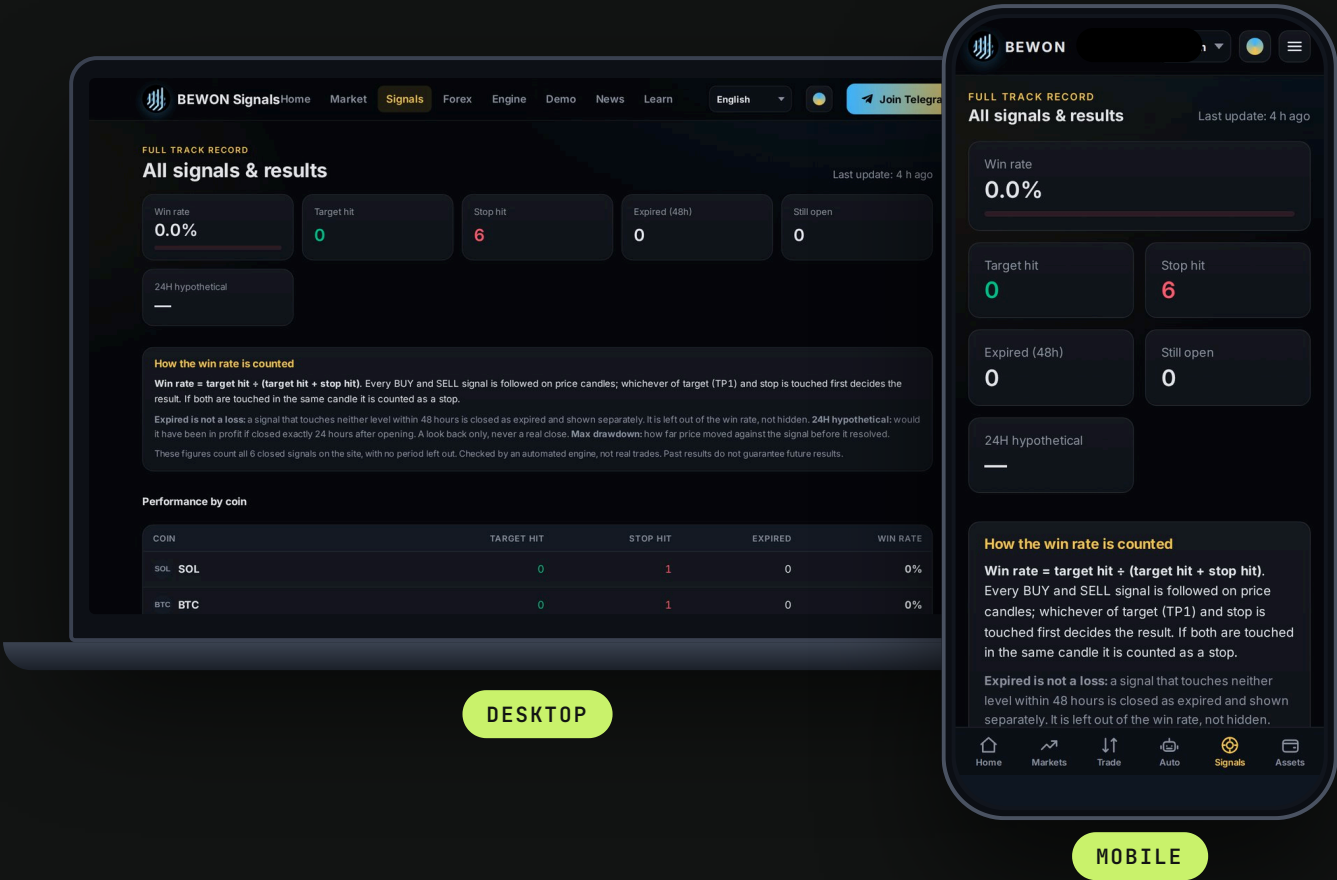

OPEN A COIN PAGE ➔

bewonnetwork.github.io/crypto-singals/#/coin/BTC

SIGNALS

Every signal, *every result*

The full public record: open signals, closed signals and how each one ended. Nothing is removed.

01 Track record

Targets hit, stops hit, expired and still open, counted over every closed signal.

02 How it is counted

Win rate = target hit ÷ (target hit + stop hit). The rule is printed on the page.

03 Performance by coin

A per-coin table, so weak coins are as visible as strong ones.

04 Market Watch notes

Unconfirmed setups are shown as notes with a score, without entry or target.

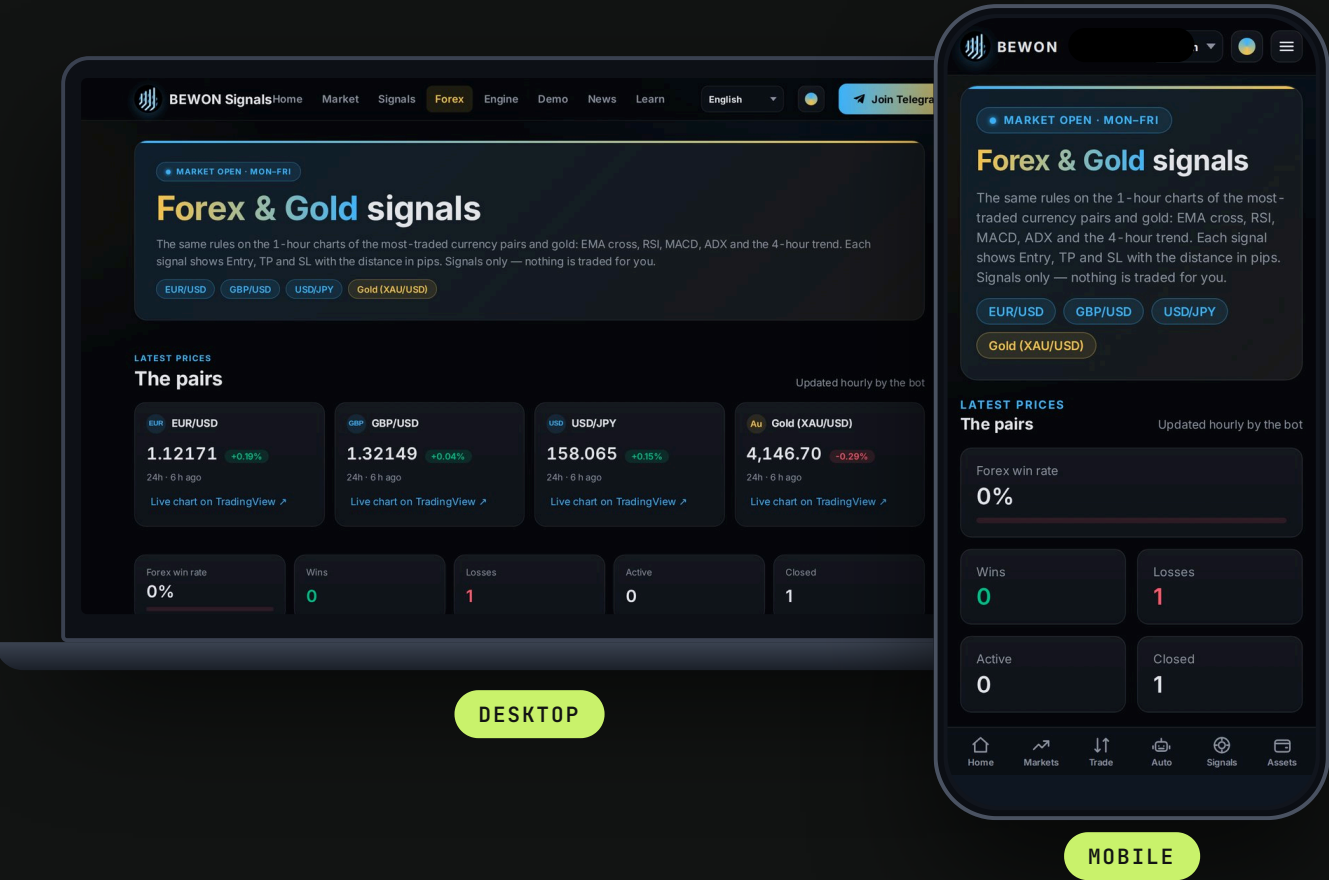

SEE THE RECORD ↗

bewonnetwork.github.io/crypto-singals/#/signals

FOREX & GOLD SIGNALS

Four more markets, *same rules*

EUR/USD, GBP/USD, USD/JPY and Gold are read on the 1-hour chart with the same engine as crypto.

01 Market-hours badge

Shows when the Forex market is open, Monday to Friday.

02 Latest prices

Each pair with its 24-hour change and a link to a live chart.

03 Separate record

Forex wins, losses, active and closed signals are counted on their own.

04 Pips included

Entry, targets and stop are shown with the distance in pips.

SPOT TRADING

Buy and sell *without the risk*

A full spot screen with practice money: the same chart, order book and order form a real exchange shows.

- 01 Market and limit orders

Buy now at the live price, or set your own price and wait.
- 02 Live order book

Bids and asks beside the chart, with the 24-hour range above.
- 03 TP and SL on holdings

Set a take-profit and a stop-loss for any coin you hold.
- 04 0.1% fee, like real

A fee is charged on every practice order so results stay realistic.

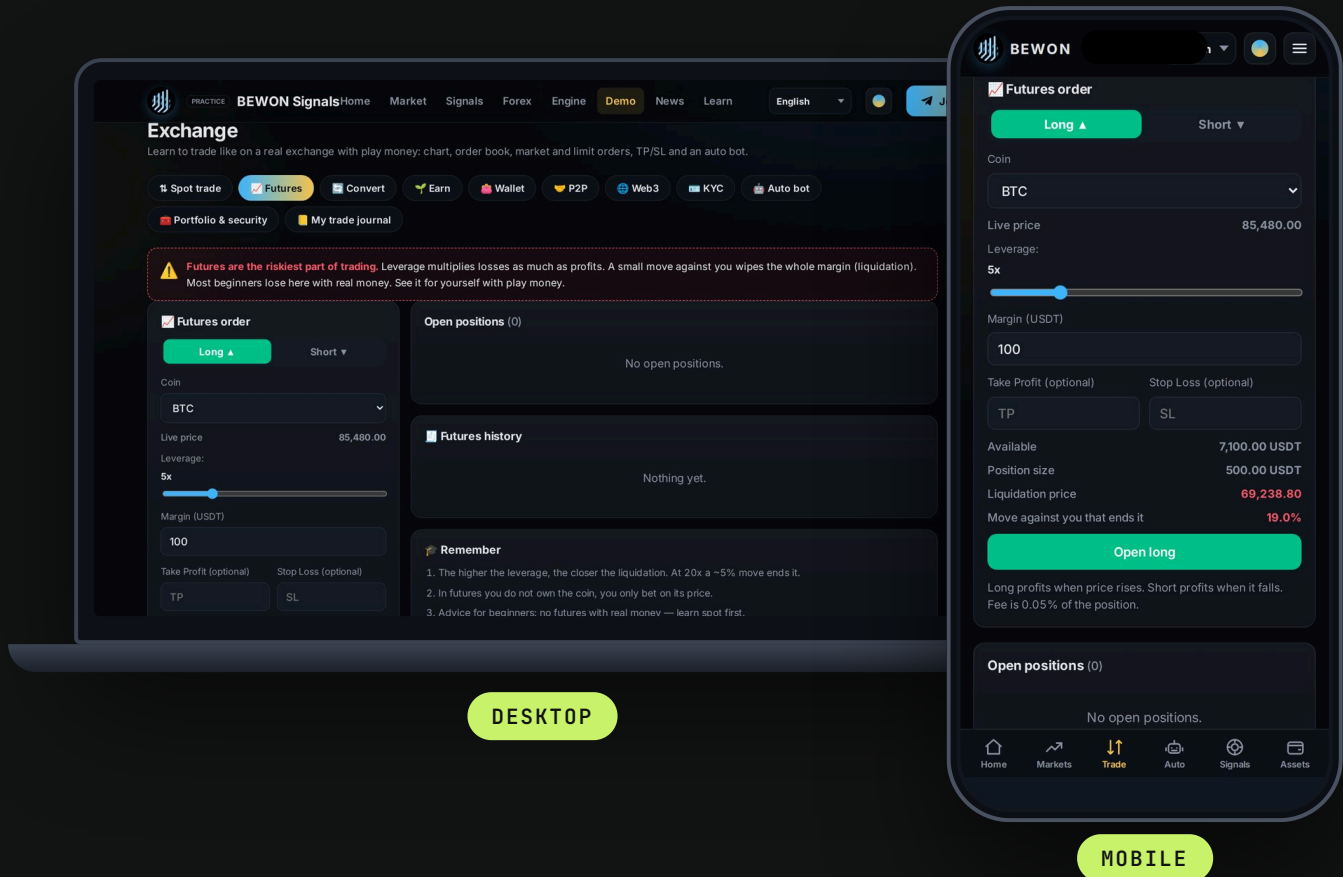

OPEN SPOT TRADING ➤

bewonnetwork.github.io/crypto-singals/#/demo/trade

FUTURES

Long, short, *TP and SL*

Practise leverage safely: the screen shows the liquidation price before you open and warns about the risk.

01 Long or short

Trade both directions on the listed coins with practice money.

02 Leverage slider

Choose the leverage and see the position size change with it.

03 Take Profit and Stop Loss

Set both when opening, or edit them later on an open position.

04 Liquidation price

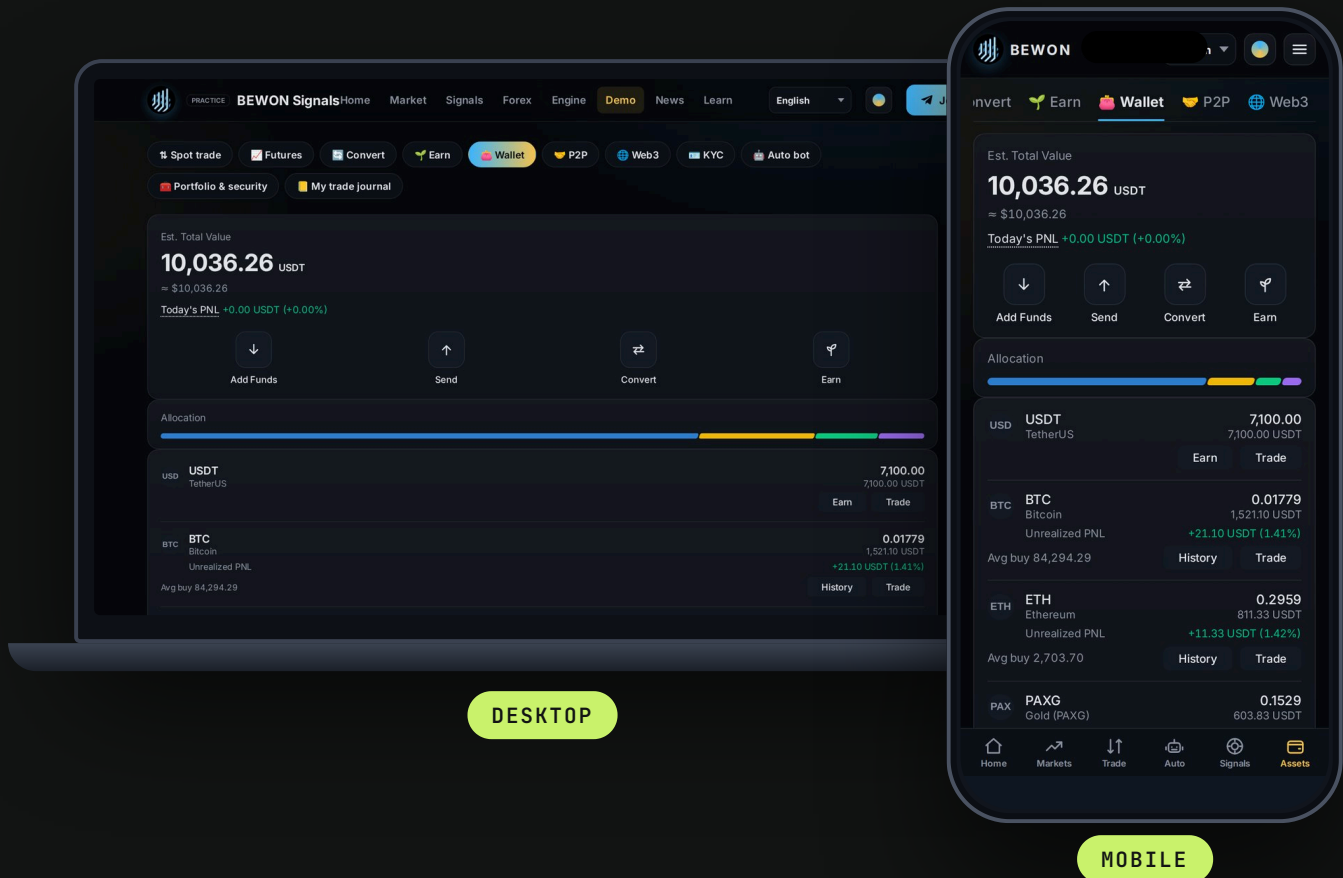

Shown up front, with how far the price must move against you.

[OPEN FUTURES ↗](#)
bewonnetwork.github.io/crypto-singals/#/demo/fut

ASSETS

A wallet page *that explains itself*

One page for the whole practice account: total value, today's result and every coin held.

DESKTOP

MOBILE

01 Biggest coins first

Holdings are ordered by value, with an allocation bar on top.

02 Average buy price

Each coin shows what you paid on average and the unrealised result.

03 Buy history per coin

Tap History on a coin to see every buy and sell of it.

04 All transactions by date

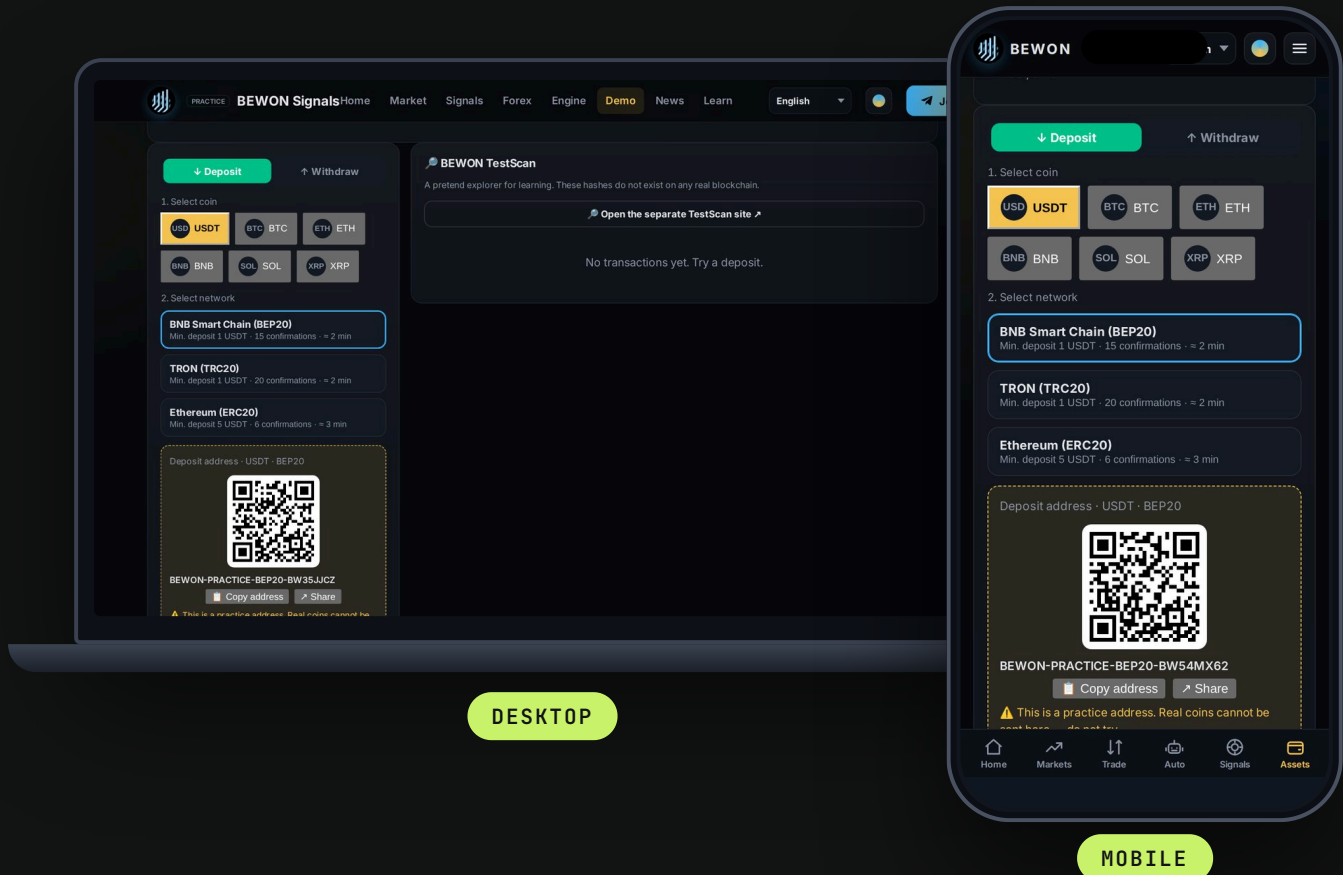

Recent activity first; pick a date to look further back.

[OPEN ASSETS ↗](#)
bewonnetwork.github.io/crypto-singals/#/demo/wallet

DEPOSIT & WITHDRAW

The exchange flow, *step by step*

The same order of steps a real exchange uses, so the first real transfer is not the first time you see it.

DESKTOP

MOBILE

01 Select coin, then network

Each network shows its minimum, confirmations and usual time.

02 Address and QR code

Copy or share the practice address. It is clearly marked as practice.

03 Withdraw with review

Fee, amount received and a confirm step before anything is sent.

04 Wrong network caught

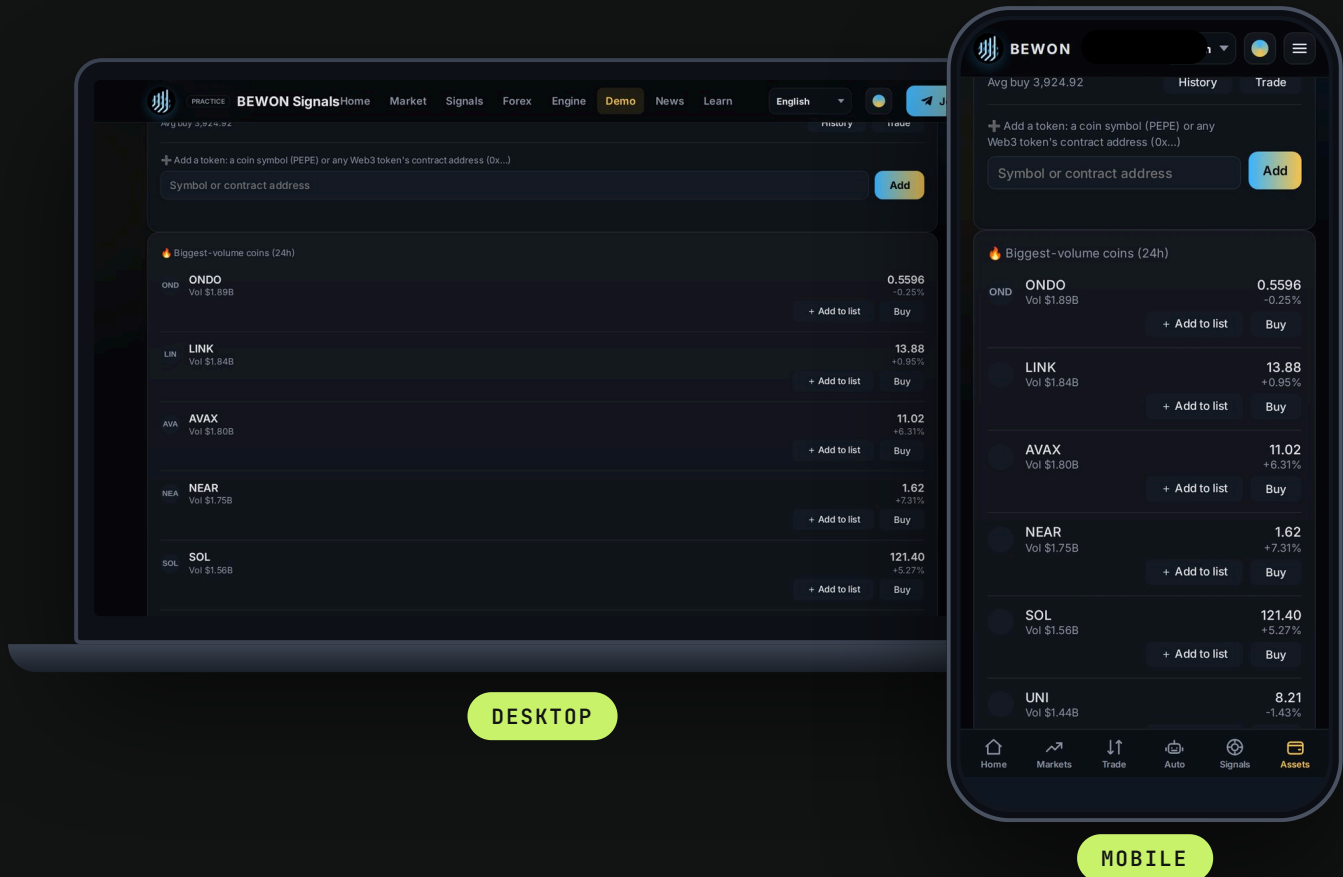

An address that does not match the network is refused with a reason.

[OPEN DEPOSIT](#)
bewonnetwork.github.io/crypto-singals/#/demo/wallet

— ADD ANY TOKEN

Follow *any coin or Web3 token*

The watch list is not limited to the big names. Add what you want to follow and practise with.

DESKTOP

MOBILE

01 By symbol

Type a listed symbol such as PEPE and it joins your list.

02 By contract address

Paste a 0x... contract address and the token is found with its DEX price.

03 Risk warnings

Low liquidity, a very new pair or a copied name is flagged before you add it.

04 Biggest-volume list

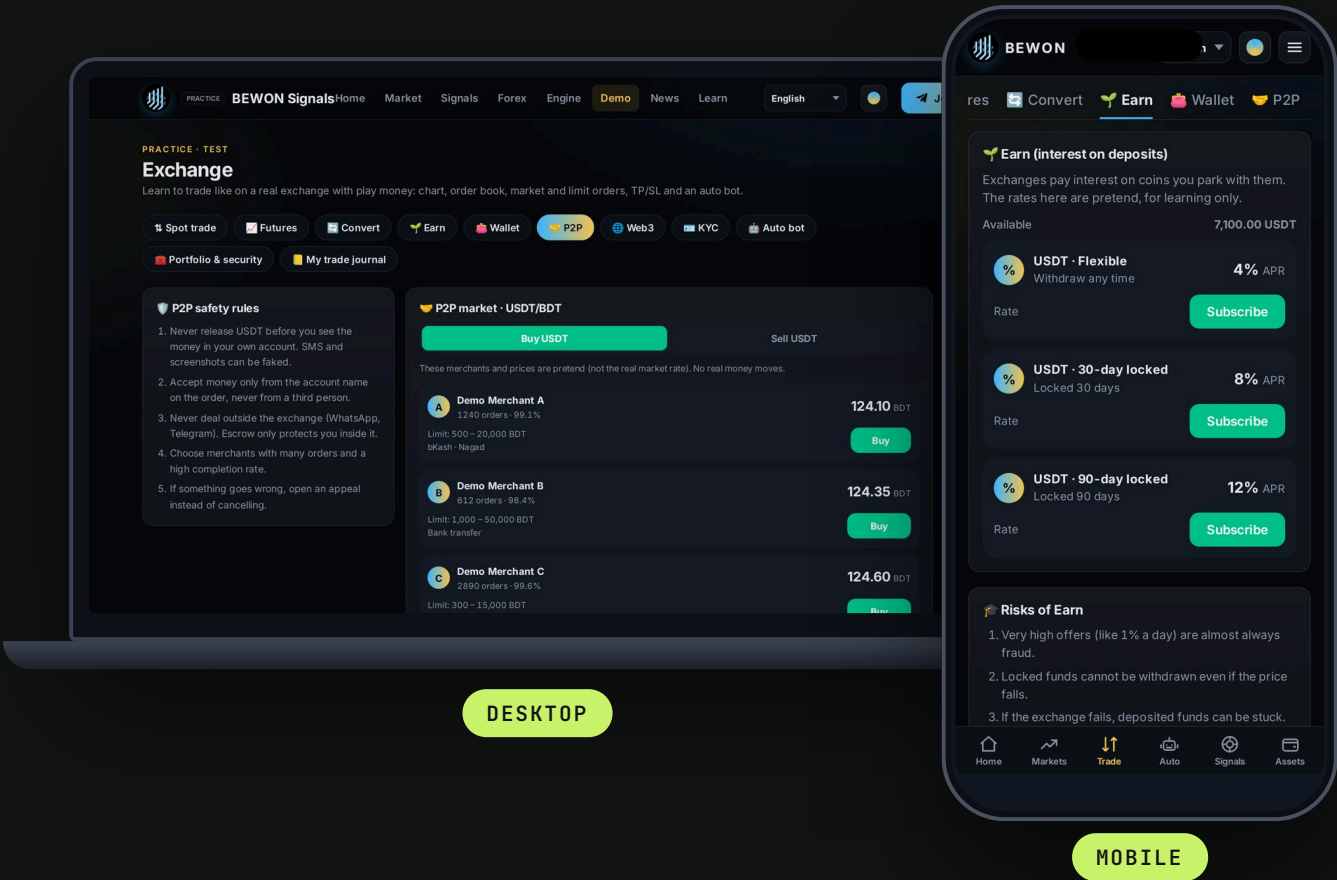

A ready list of high-volume coins with one-tap Add and Buy.

[OPEN THE WALLET ↗](#)
bewonnetwork.github.io/crypto-singals/#/demo/wallet

— CONVERT, EARN & P2P

Three more desks, *all in practice*

The other tabs of an exchange are here too, so nothing is new when you meet them for real.

- 01

Convert

Swap one coin for another in a single step, with the rate shown first.
- 03

P2P

Walk through a P2P order with practice merchants and the safety rules.

- 02

Earn

Try flexible and locked saving and read the risks listed beside the rates.
- 04

Rates are examples

Earn rates and P2P prices are for learning. They are not offers.

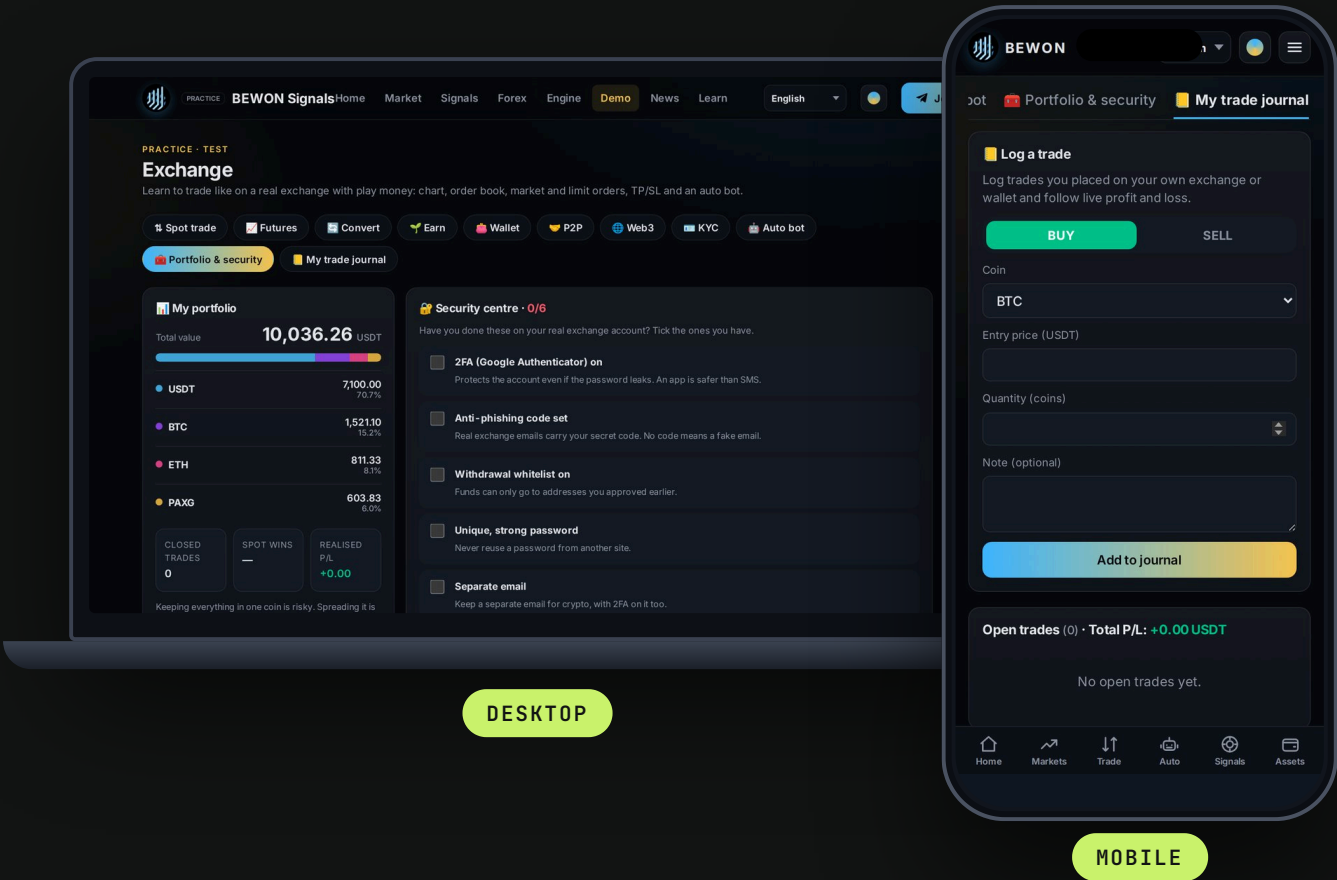

OPEN CONVERT ↗

bewonnetwork.github.io/crypto-singals/#/demo/conv

PORTFOLIO, SECURITY & JOURNAL

Habits that *keep accounts alive*

Trading well is mostly routine. These tools turn the routine into something you can tick off.

- 01

Portfolio view

Total value split by coin, with closed trades and realised result.
- 03

Price alerts

Choose a coin and a level and get told when the price crosses it.

- 02

Security checklist

2FA, anti-phishing code, withdrawal whitelist and password habits.
- 04

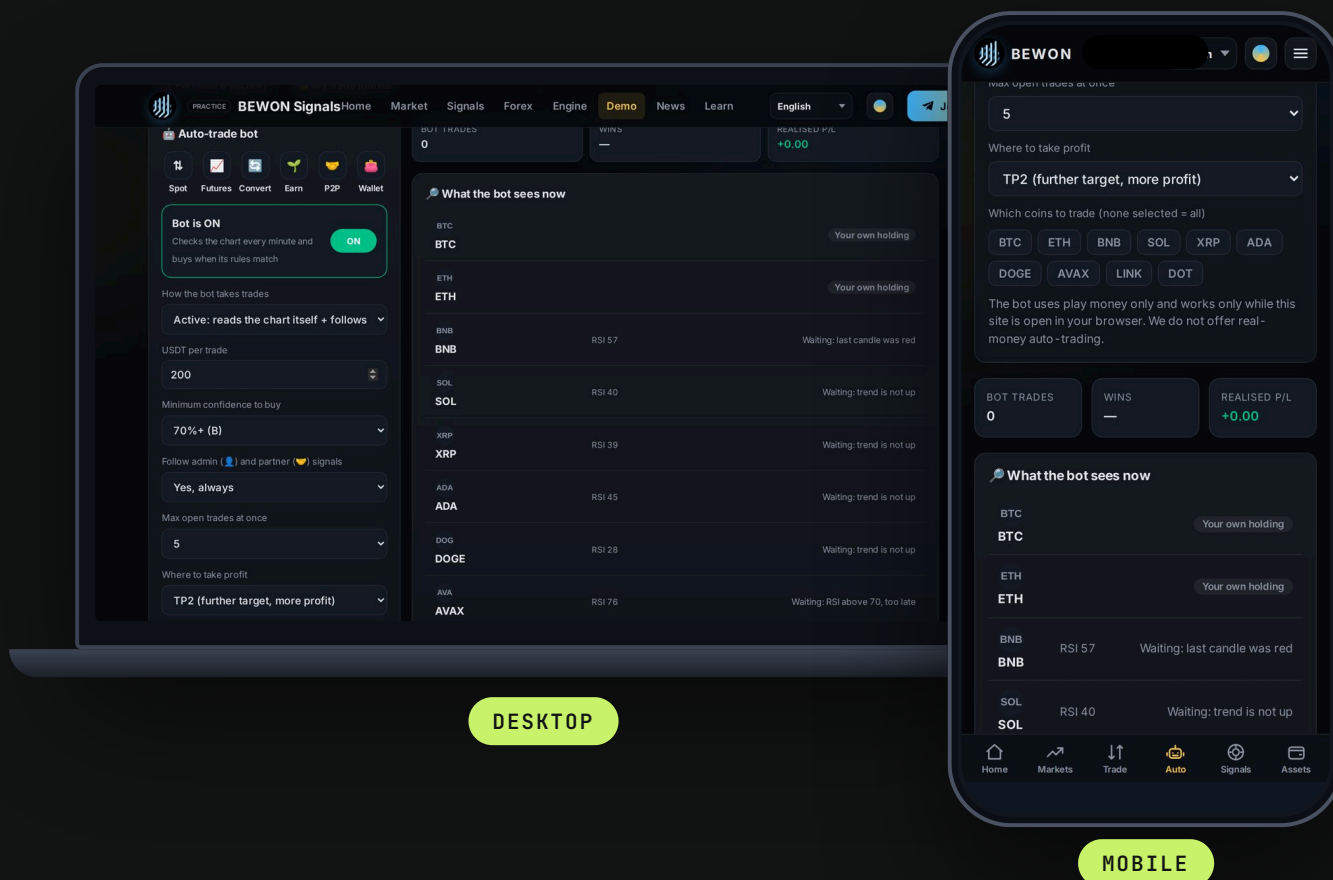

Trade journal

Log trades made anywhere and follow their profit and loss live.

— AUTO-TRADE BOT

A bot that shows *its reasoning*

Switch it on and it trades the practice account by itself. Beside every coin it says why it bought or why it waits.

DESKTOP

MOBILE

01 Reads the 15-minute chart

Trend up, RSI between 50 and 70 and a green candle are needed to buy.

02 Own target and stop

Each trade gets a take-profit and a stop-loss from the coin's volatility.

03 Your settings

Amount per trade, maximum open trades and which coins it may touch.

04 Honest result card

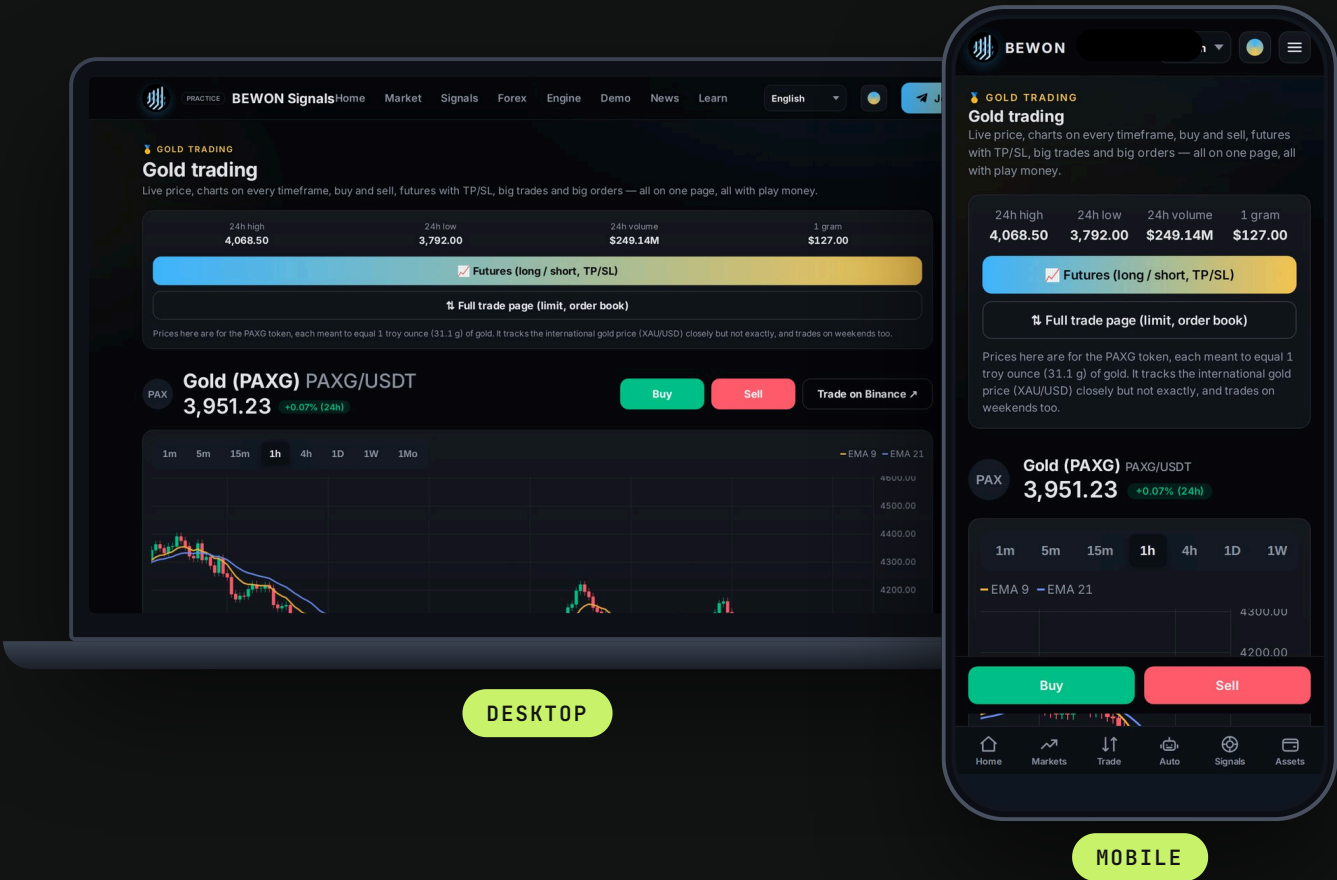

Wins and losses are both counted. It trades practice money only.

[OPEN THE BOT ↗](#)
bewonnetwork.github.io/crypto-singals/#/demo/bot

GOLD TRADING

Gold on *one page*

Price, chart, buying, selling and futures for gold, gathered on a single screen.

- 01

Price per ounce and gram

The live price with the 24-hour high, low and volume.
- 03

Buy, sell and futures

Spot orders plus long and short with TP and SL, in practice money.

- 02

Charts to one month

The same eight timeframes as every coin page.
- 04

Gold signals

The bot's XAU/USD signals are listed on the same page.

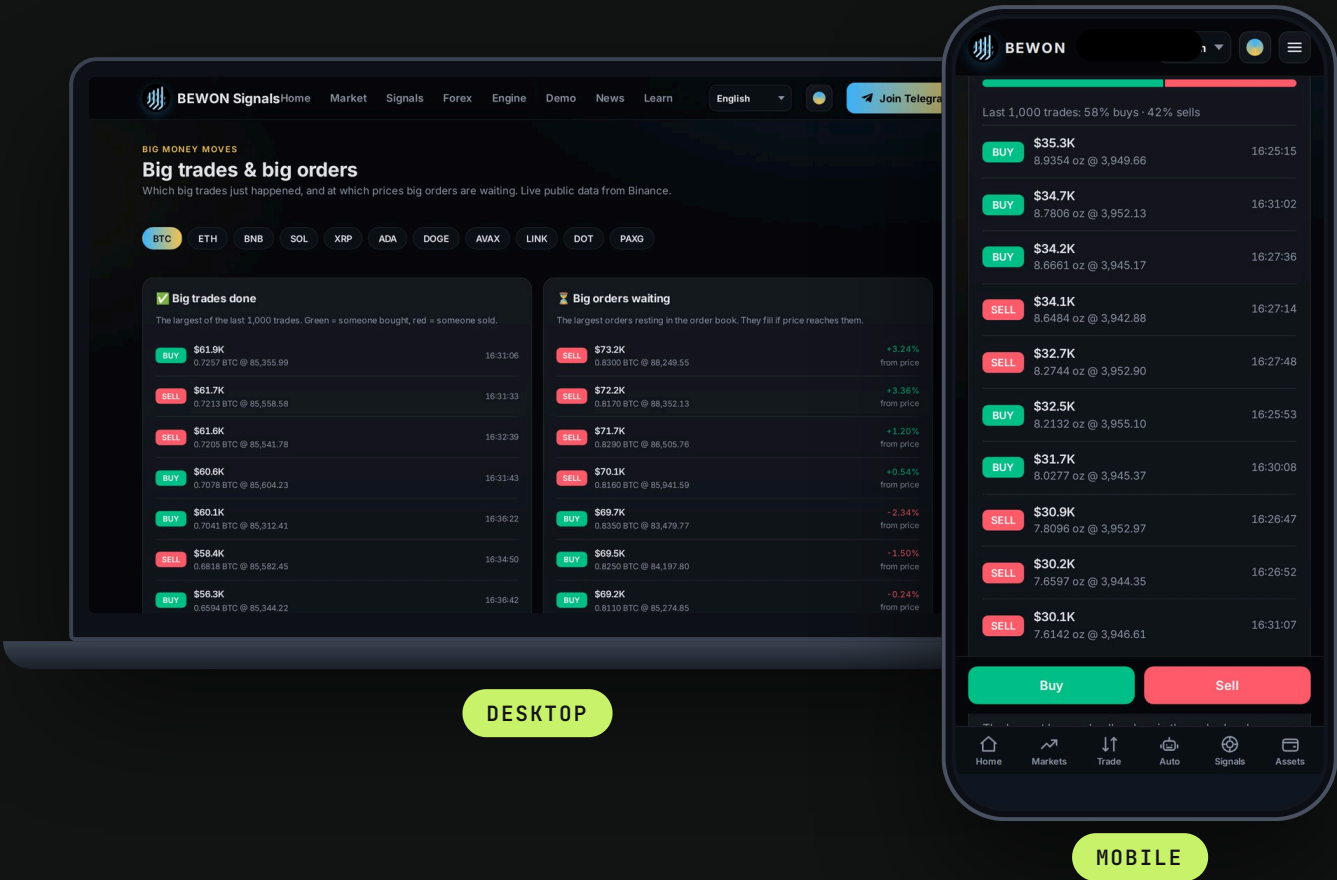

OPEN GOLD ↗

bewonnetwork.github.io/crypto-singals/#/gold

BIG TRADES & BIG ORDERS

See where *large money moves*

The largest recent trades and the largest orders waiting in the book, from live public data.

- 01

Big trades done

The biggest of the last 1,000 trades, marked buy or sell.
- 03

Buy versus sell share

A bar showing which side has been heavier.

- 02

Big orders waiting

Large resting orders and how far they sit from the price.
- 04

Eleven markets

BTC, ETH, BNB, SOL, XRP and more, including gold.

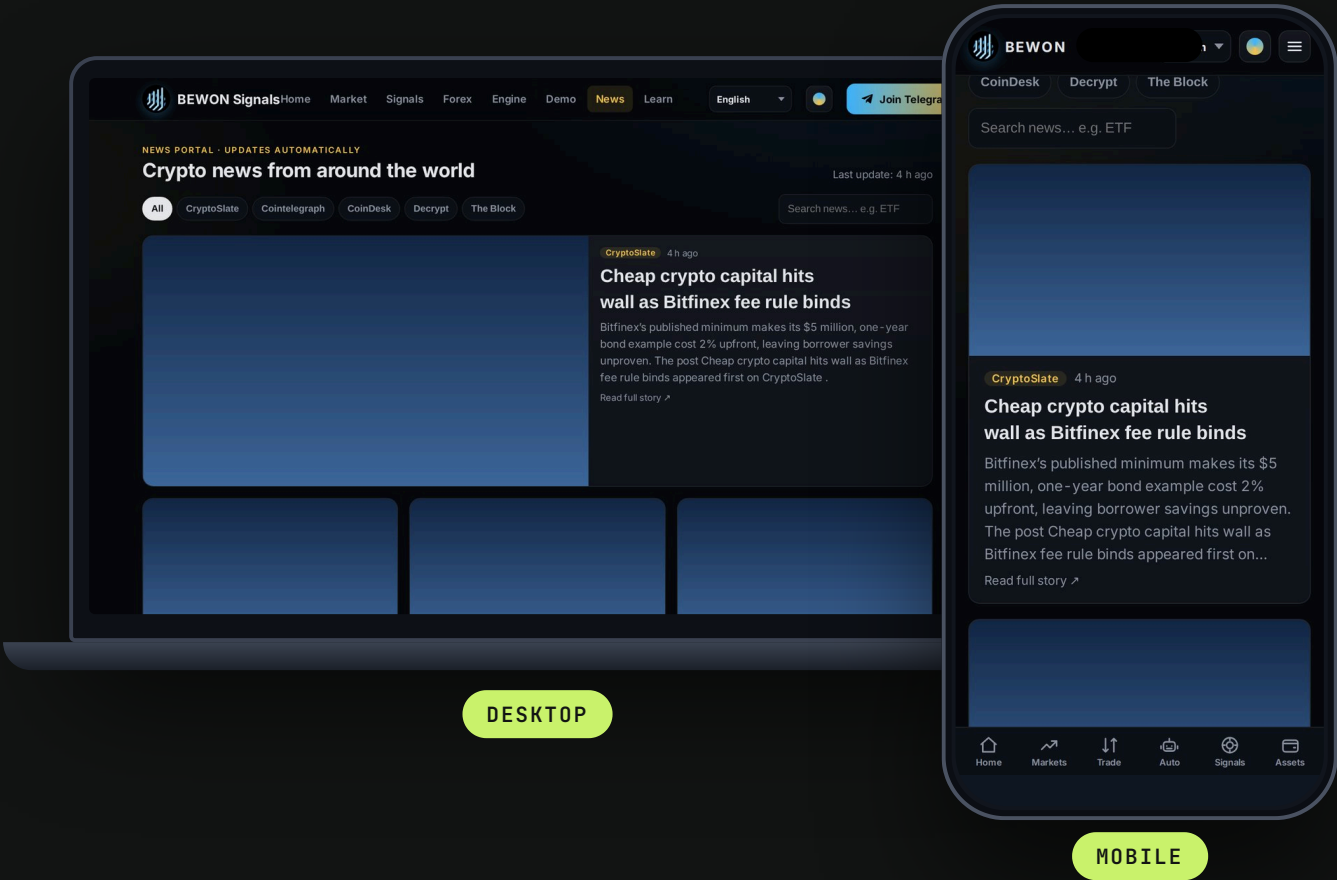

OPEN BIG TRADES ↗

bewonnetwork.github.io/crypto-singals/#/whales

NEWS

Crypto news *in one place*

Headlines from major crypto publishers, updated automatically, each with a summary and a link to the source.

- 01

Filter by source

Show everything or a single publisher.

- 02

Search

Find stories by keyword, such as ETF.

- 03

Read on the site

Each story opens with its summary; the original is one tap further.

- 04

Sent to Telegram

New stories are posted to the channel with a link back.

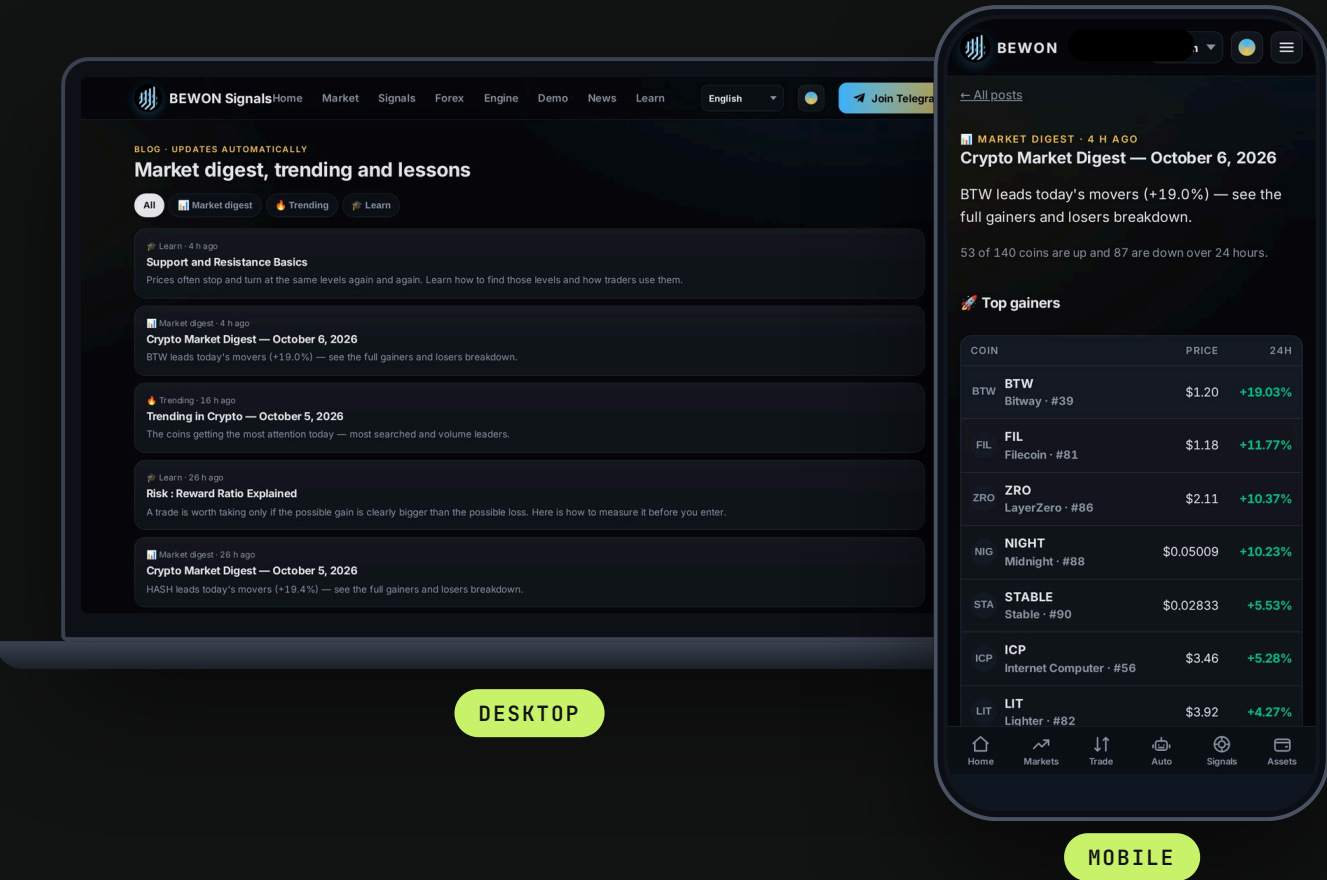

OPEN NEWS ↗

bewonnetwork.github.io/crypto-singals/#/news

BLOG

A daily digest, *written by the bot*

Three kinds of post appear on their own every day and are announced on Telegram.

01 Market digest
Every morning: top gainers and losers and how many coins rose or fell.

02 Trending
Every evening: the most searched coins and the volume leaders.

03 Daily lesson
One short lesson a day, from support and resistance to risk and reward.

04 In two languages
Lessons are available in English and Bangla.

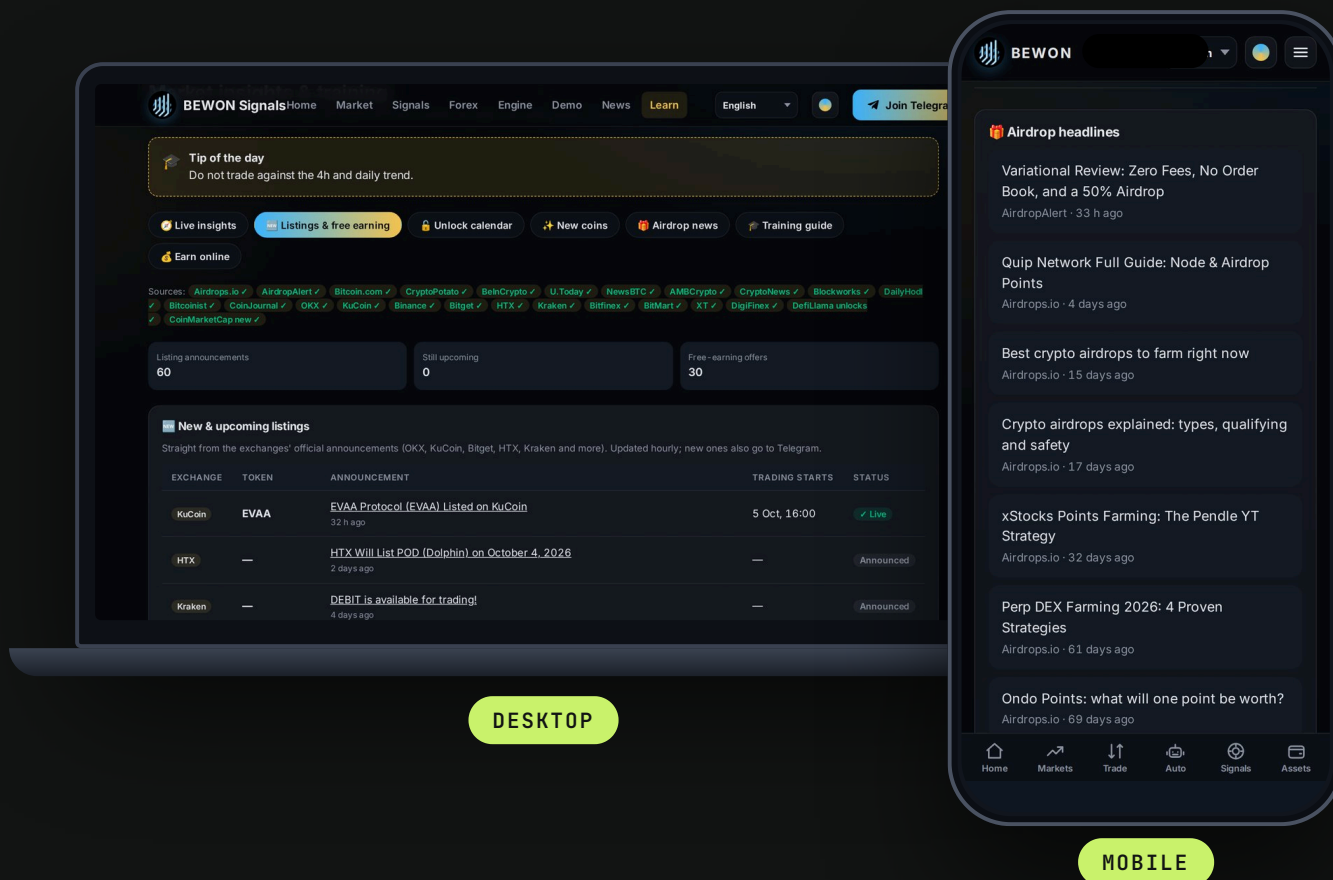

OPEN THE BLOG ↗

bewonnetwork.github.io/crypto-singals/#/blog

LISTINGS & AIRDROPS

New listings and *free-earning news*

Announcements gathered from exchanges and airdrop trackers, so opportunities are seen early.

01 New and upcoming listings

Straight from exchange announcements, with the date trading starts.

02 Free-earning offers

Launchpool and Learn & Earn style announcements.

03 Airdrop headlines

Recent guides and news from airdrop sites.

04 Check the source

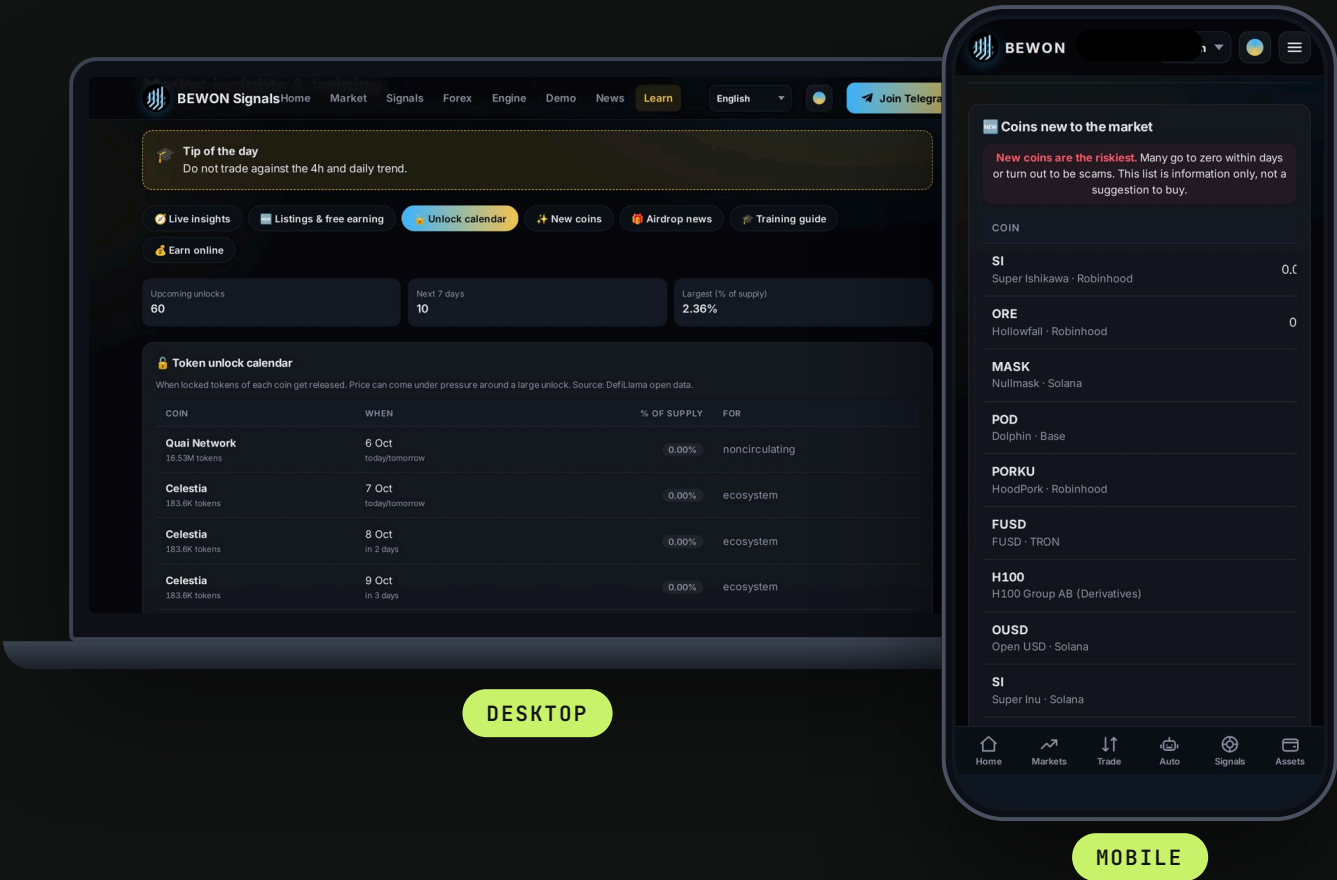

These are news items, not advice. Verify at the official page.

[OPEN LISTINGS ↗](#)
bewonnetwork.github.io/crypto-singals/#/learn/listings

UNLOCKS & NEW COINS

Know what is *coming to market*

Two calendars that help explain sudden moves: tokens being released and coins just listed.

01 Token unlock calendar
Upcoming unlocks with the date and the share of supply.

02 Next seven days
A count of the unlocks arriving this week.

03 Coins new to the market
Price, 24-hour change, volume and when each was added.

04 Risk label
New coins carry a clear warning: many fall to zero or are scams.

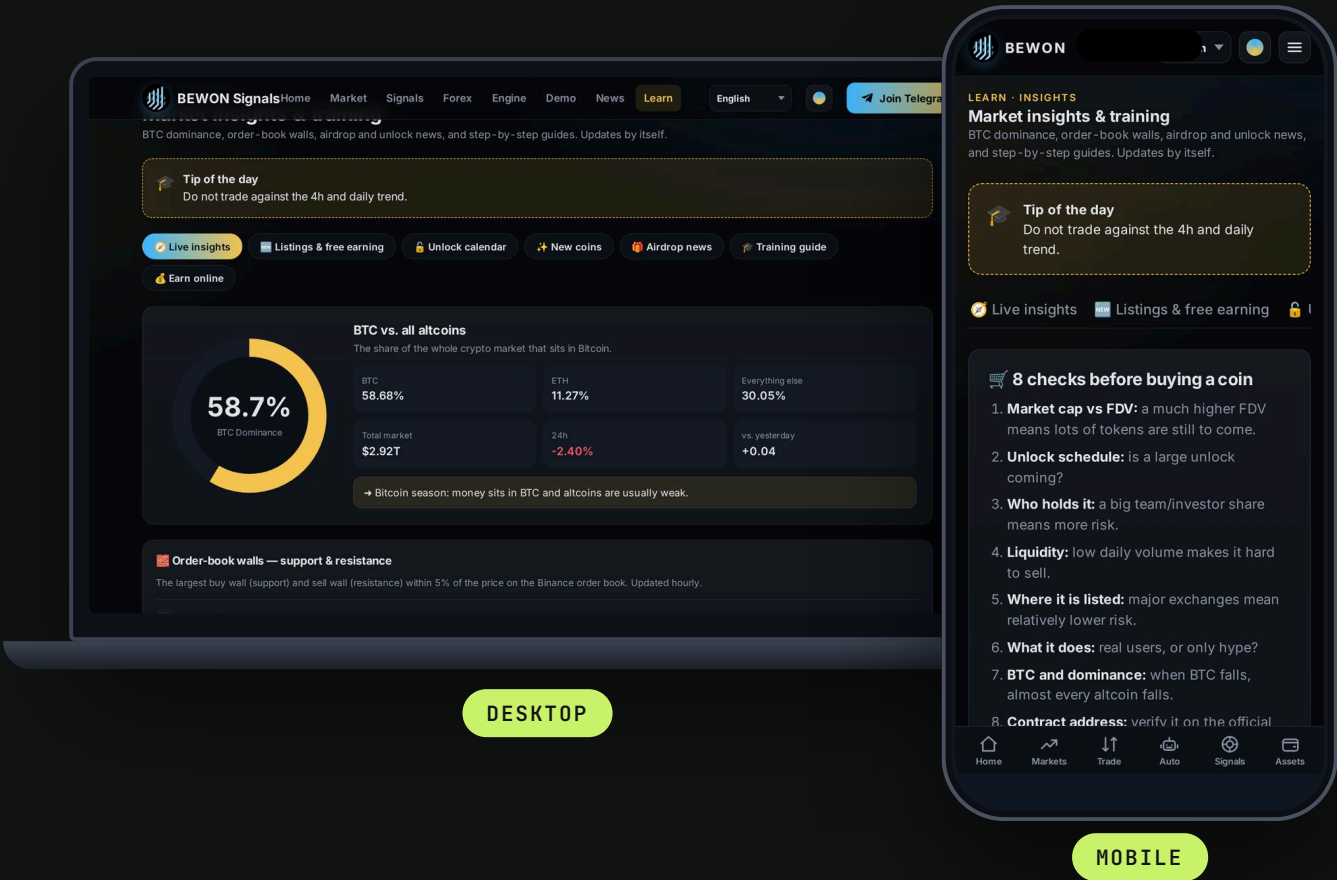

OPEN THE CALENDAR ➤

bewonnetwork.github.io/crypto-singals/#/learn/unlocks

INSIGHTS & TRAINING

Learn to read *the market yourself*

Live market structure next to plain-language checklists.

01

BTC dominance

Bitcoin's share with a note on what the current level usually means.

02

Order-book walls

The largest buy and sell walls near the price as support and resistance.

03

8 checks before buying

Market cap vs FDV, unlocks, holders, liquidity and more.

04

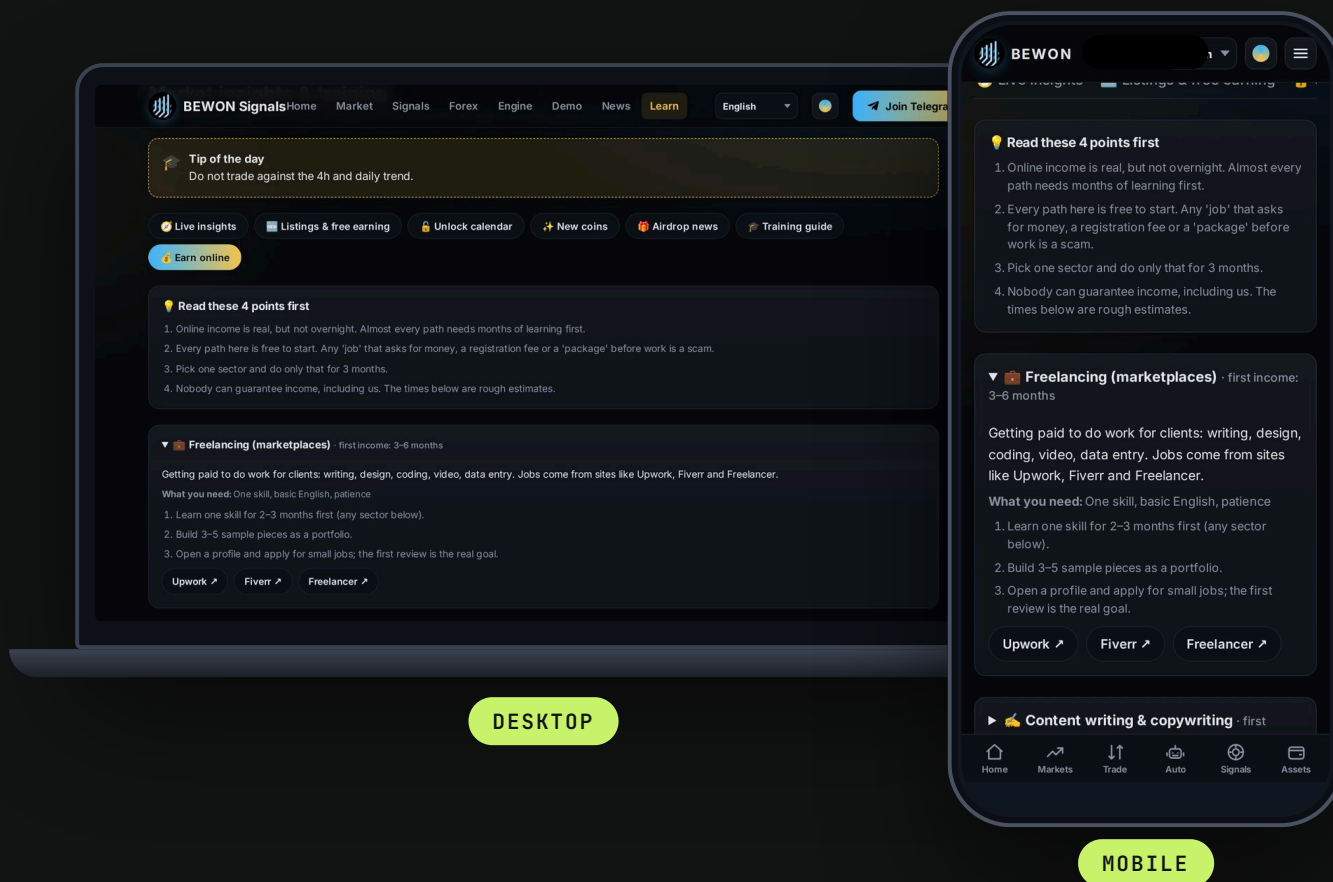

Checklist before a trade

Trend, level, reason, stop, risk and size, in order.

EARN ONLINE

Sixteen free ways *to start earning*

A learning section on real online work. Each sector explains the job, what you need and how to begin.

01 Sixteen sectors

Freelancing, writing, design, video, web development and more.

02 Three steps to start

A short, concrete first plan for every sector.

03 Free places to learn

Links to well-known free platforms and marketplaces.

04 Scam warnings

Any "job" that asks for money first is called out as a scam.

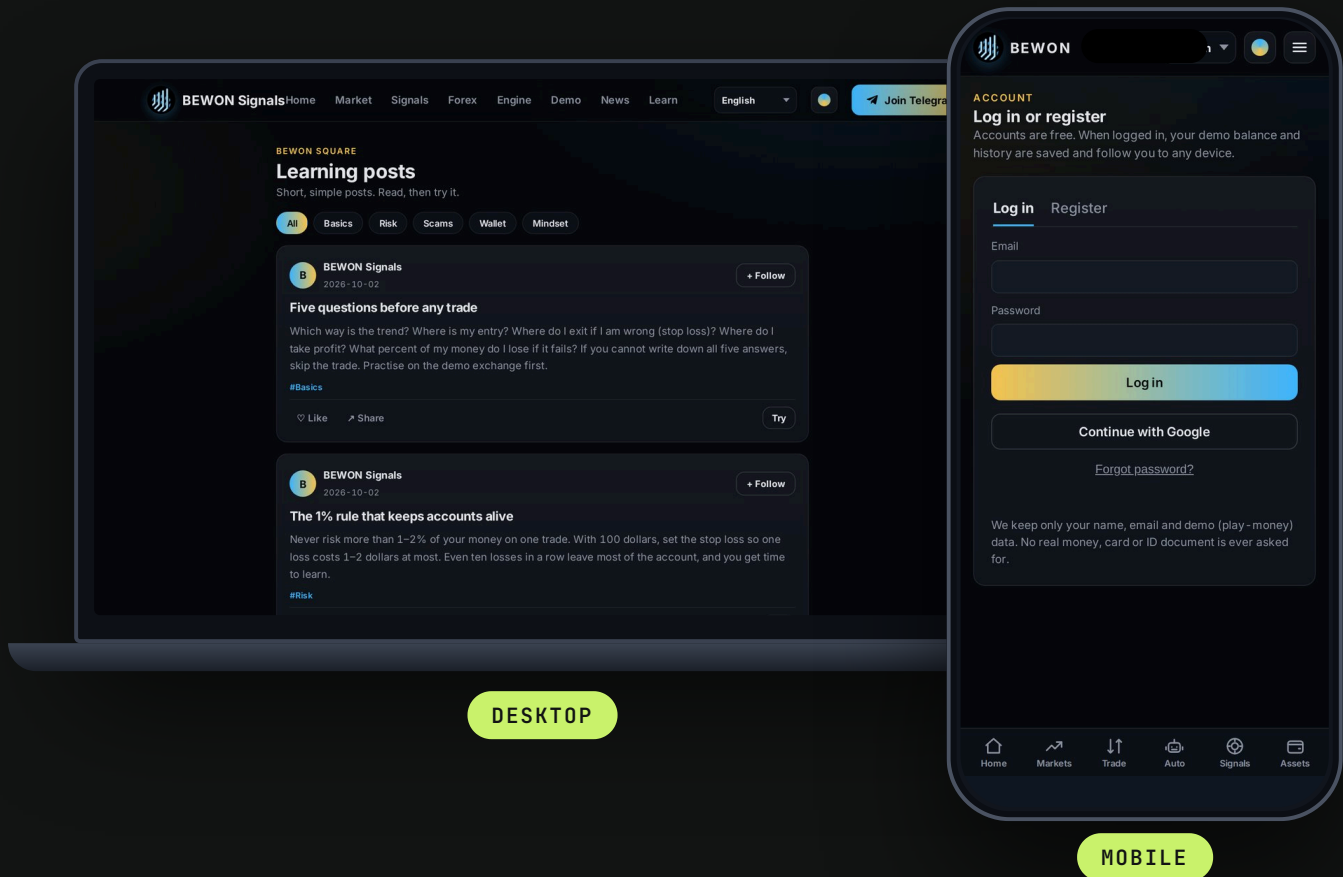

OPEN EARN ONLINE ➔

bewonnetwork.github.io/crypto-singals/#/learn/income

ACCOUNT & SQUARE

Optional account, *same free service*

Everything works without logging in. An account only adds saving and community features.

DESKTOP

MOBILE

01 Free login

Email and password or Google. No payment and no identity documents.

02 Saved across devices

The practice balance and history follow you to a new phone.

03 Square

Members write learning posts. Each is reviewed by an admin first.

04 Referral link

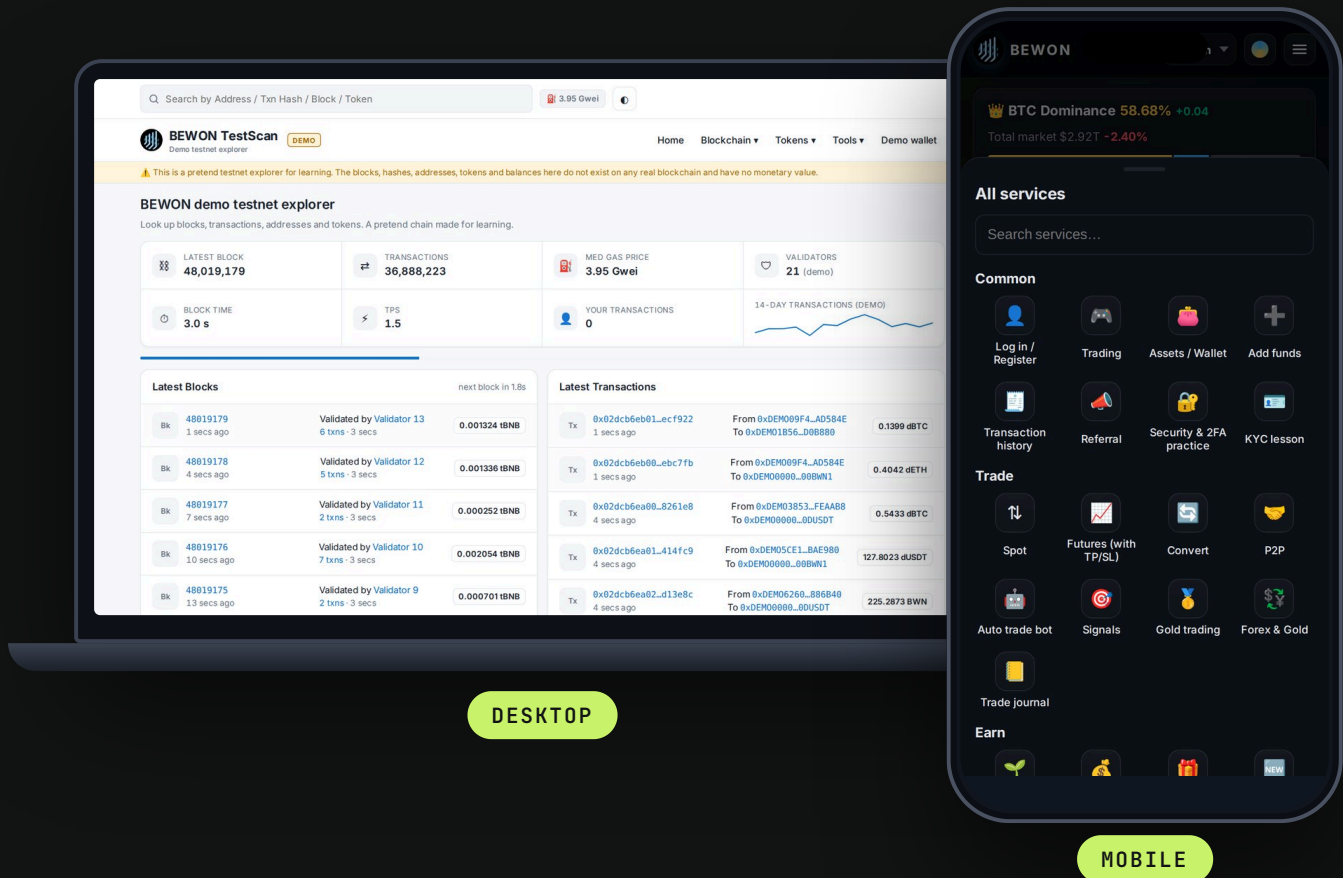

A personal link and a count of who joined. A count only, no reward.

[OPEN ACCOUNT ➤](#)
bewonnetwork.github.io/crypto-singals/#/account

ALL SERVICES & TESTSCAN

Everything in *one menu*

A single searchable menu reaches every page, including a practice block explorer.

DESKTOP

MOBILE

01 All services menu

Common, Trade, Earn, Information, Web3 and Help, with search.

02 TestScan explorer

A practice explorer for blocks, transactions, addresses and tokens.

03 Practice Web3 wallet

Create a practice wallet and learn how a seed phrase works.

04 Install as an app

Add BEWON to the phone's home screen with its own icon.

[OPEN TESTSCAN](#)
bewonnetwork.github.io/crypto-singals/scan/

— SIGNALS, UPGRADED

Watch notes, *not hype*

01

Score out of 100

The 1-hour score is blended with how many timeframes (4H, 15M, 5M) agree.

02

Four confirmations

Run-up, RSI, extension and range. A full signal needs at least three of them.

03

Market Watch notes

When a setup is not confirmed, the bot posts the score and reasons with no entry, target or stop.

04

Track record rules

Win rate = target hit ÷ (target hit + stop hit), counted over every closed signal, no period left out.

05

Drawdown and 24h view

Each signal records how far price moved against it, and where it stood after 24 hours.

06

Admin and partner signals

Signals entered by hand are tracked the same way and carry their own label.

Expired is not a loss — and it is not hidden either.

HOW THE TRACK RECORD IS COUNTED

EARN ONLINE · THE SIXTEEN SECTORS

Where an income *can start*

The time shown is a rough estimate to a first income, not a promise. Every path is free to start.

01 Freelancing 3-6 months

03 Graphic design 2-4 months

05 Web development 6-12 months

07 YouTube 6-18 months

09 Online tutoring 1-2 months

11 Translation & transcription 1-3 months

13 App testing & bug bounty 1-12 months

15 Microtasks & surveys a few days

02 Content writing 1-3 months

04 Video editing 2-4 months

06 Digital marketing & SEO 3-6 months

08 Affiliate marketing 6-12 months

10 Virtual assistant & data entry 1-3 months

12 Stock media & digital products 3-9 months

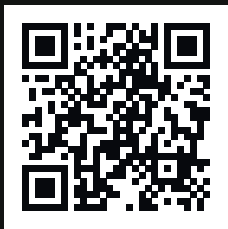

14 Airdrops & Learn & Earn uncertain

16 Selling products online 1-3 months

Skills first, no shortcuts

None of these is guaranteed. Any “job” that asks for a deposit, a registration fee or a package before work is a scam.

One service. Zero cost. *Honest numbers.*
