BEWON Signals

NFT & NODE WHITEPAPER · VERSION 1.0 · OCTOBER 2026

NFT Market & Node Mining

Two new BEWON modules, explained.

How the marketplace and node mining work, every rule and number, the design, the safety lessons, and what a real version would require. Demo phase: no real money, no token.

ABSTRACT

NFTs and nodes, learned by doing

BEWON adds two new practice modules to its platform: an **NFT Marketplace** and **Node Mining**. Both follow the rule that runs through all of BEWON: people should be able to try a crypto product, see every number and make mistakes before any real money is involved.

The NFT Marketplace lets members explore four original collections, buy, make offers, mint their own artwork, list it for sale and track every event. Node Mining lets members start a node session once a day, watch it run for 24 hours even with the site closed, and collect BWN points that can be spent on minting.

Everything runs on the demo balance. NFTs here are not on a blockchain. BWN points are not a coin or token, cannot be withdrawn or sold and have no money value. This paper explains how each part works, the exact rules and numbers, the design, the safety lessons built in, and what any future real version would require.

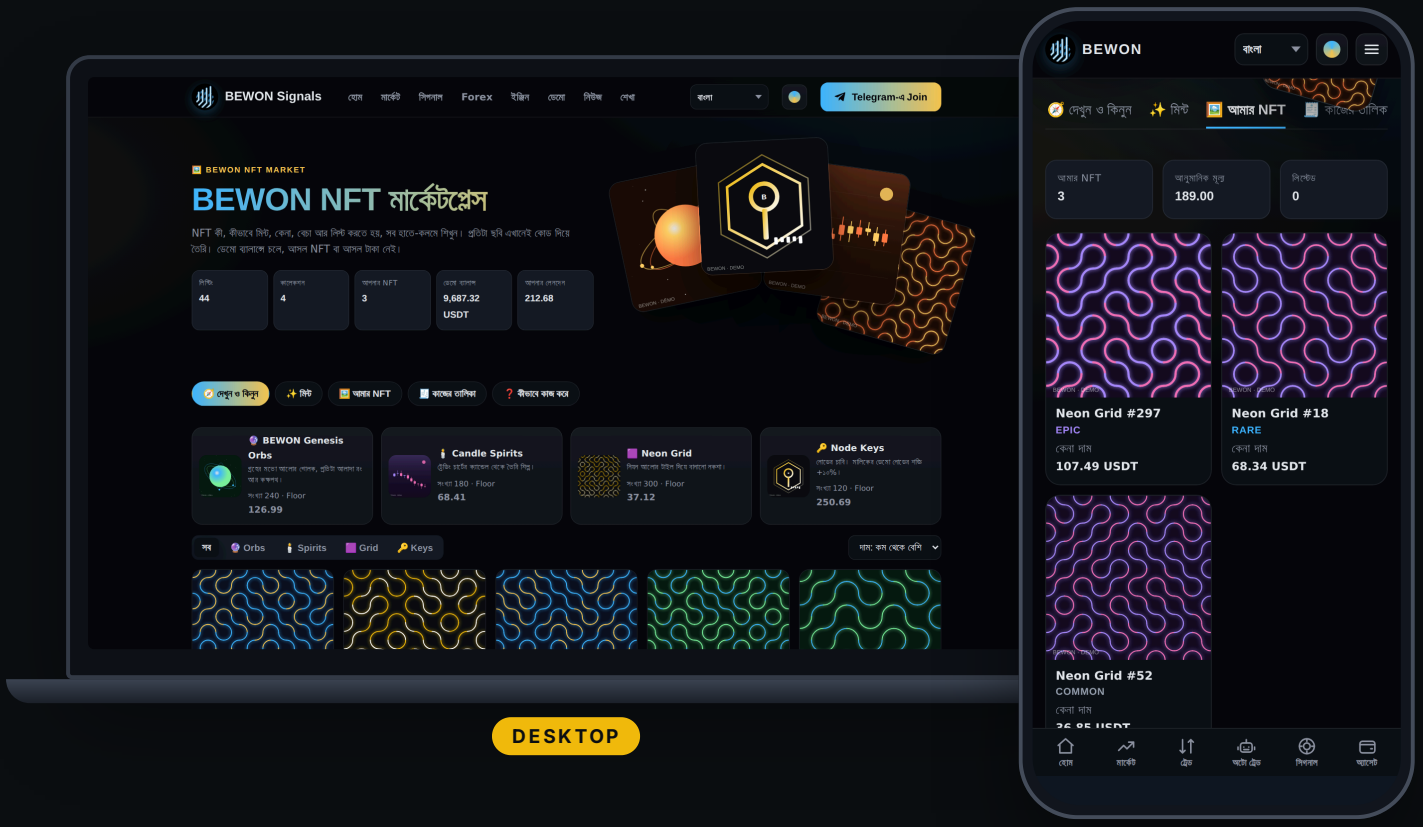

4	840	4	0
NFT collections	possible collection items	node types	real money involved

Version	1.0 — October 2026
Website	bewonnetwork.github.io/crypto-singals/#/nft · /#/node
Telegram	t.me/all_crypt_signals
Status	Live in demo mode
Token	None. BWN points are demo points, not a token.

— 1 · NFT MARKETPLACE

A marketplace that looks and works like the real thing

The marketplace has the screens members will meet on real NFT platforms: collection cards with floor price, a filterable grid, item pages with traits and rarity, buy and offer buttons, a mint studio, a personal gallery and an activity log.

DESKTOP

MOBILE

Screen	Status	What it does
Explore	SIMULATED	New demo listings every day across four collections, sorted by price or rarity, filtered by collection.
Item page	LIVE	Large artwork, rarity, palette and form traits, fair value, collection floor, seller, Buy now and Make offer.
Mint	LIVE	Pick a style, roll designs, name it, pay 5 demo USDT or 50 BWN points.
My NFTs	LIVE	Gallery with estimated value, list for sale, change price, cancel, or sell instantly to the demo pool.
Activity	LIVE	Every buy, sale, mint, listing, cancellation and declined offer, with profit or loss.

2 · COLLECTIONS & RARITY

Original art, generated in code

Every artwork is drawn by BEWON's own code from a number (the seed). The same seed always gives the same picture, so an item looks identical on every device without storing any image. No artwork is copied from any other project.

Collection	Items	Base floor (demo USDT)	Description
BEWON Genesis Orbs	240	120	Glowing orbs with their own colours, rings and moons.
Candle Spirits	180	60	Abstract art built from trading-chart candles.
Neon Grid	300	35	Neon tile patterns; line weight grows with rarity.
Node Keys	120	250	Hexagon key badges. Each one held adds 10% to the owner's demo node power (up to 3).

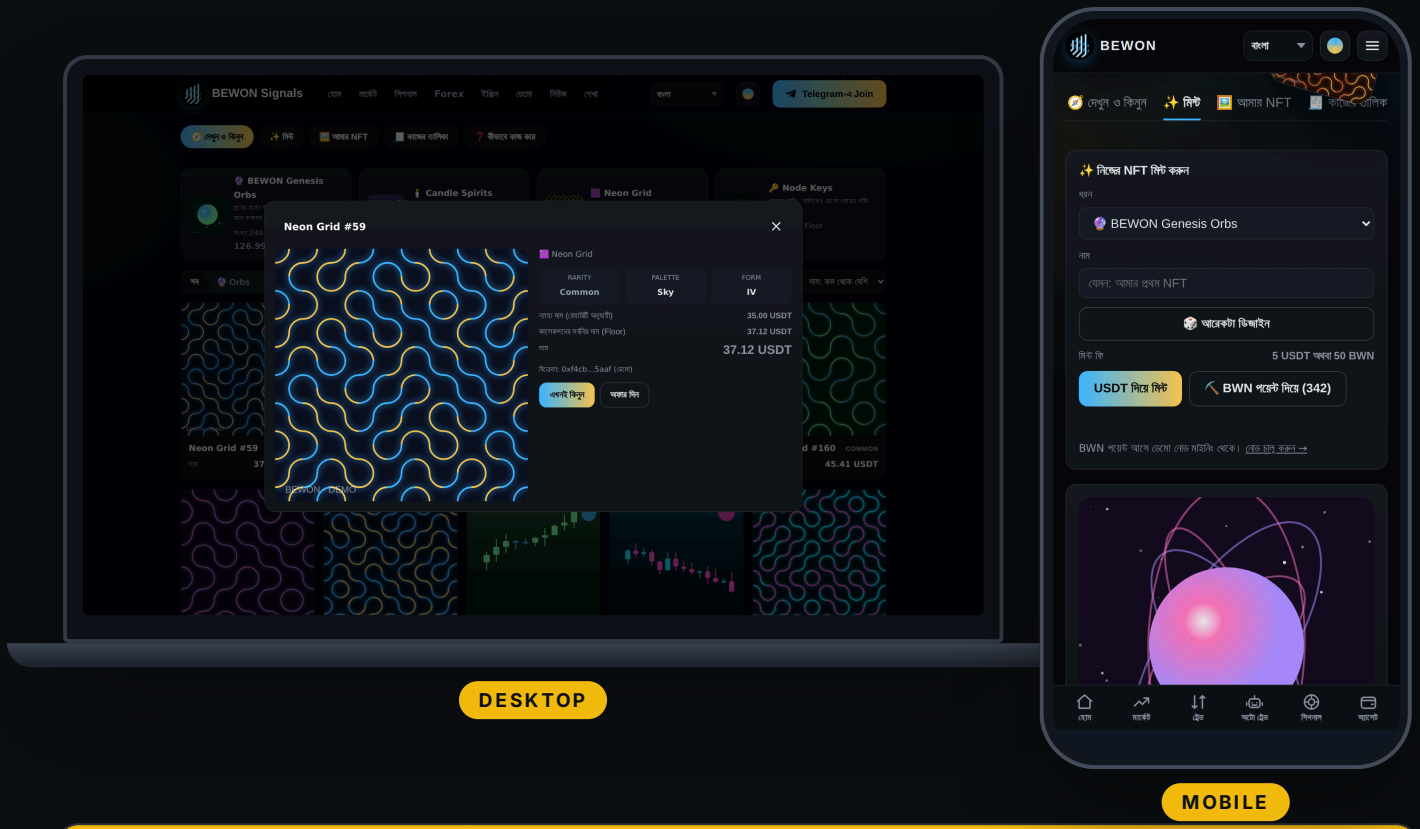

Rarity tiers

Rarity	Share of items	Fair value = base floor ×
Common	≈ 60%	1.0 ×
Rare	≈ 25%	1.6 ×
Epic	≈ 12%	2.8 ×
Legendary	≈ 3%	6.0 ×

Each item also has a palette (8 options) and a form (4 options). Listing prices are fair value plus 0–40%, so the cheapest listing in a collection sets its floor.

3 · TRADING RULES

Every rule, in plain numbers

DESKTOP

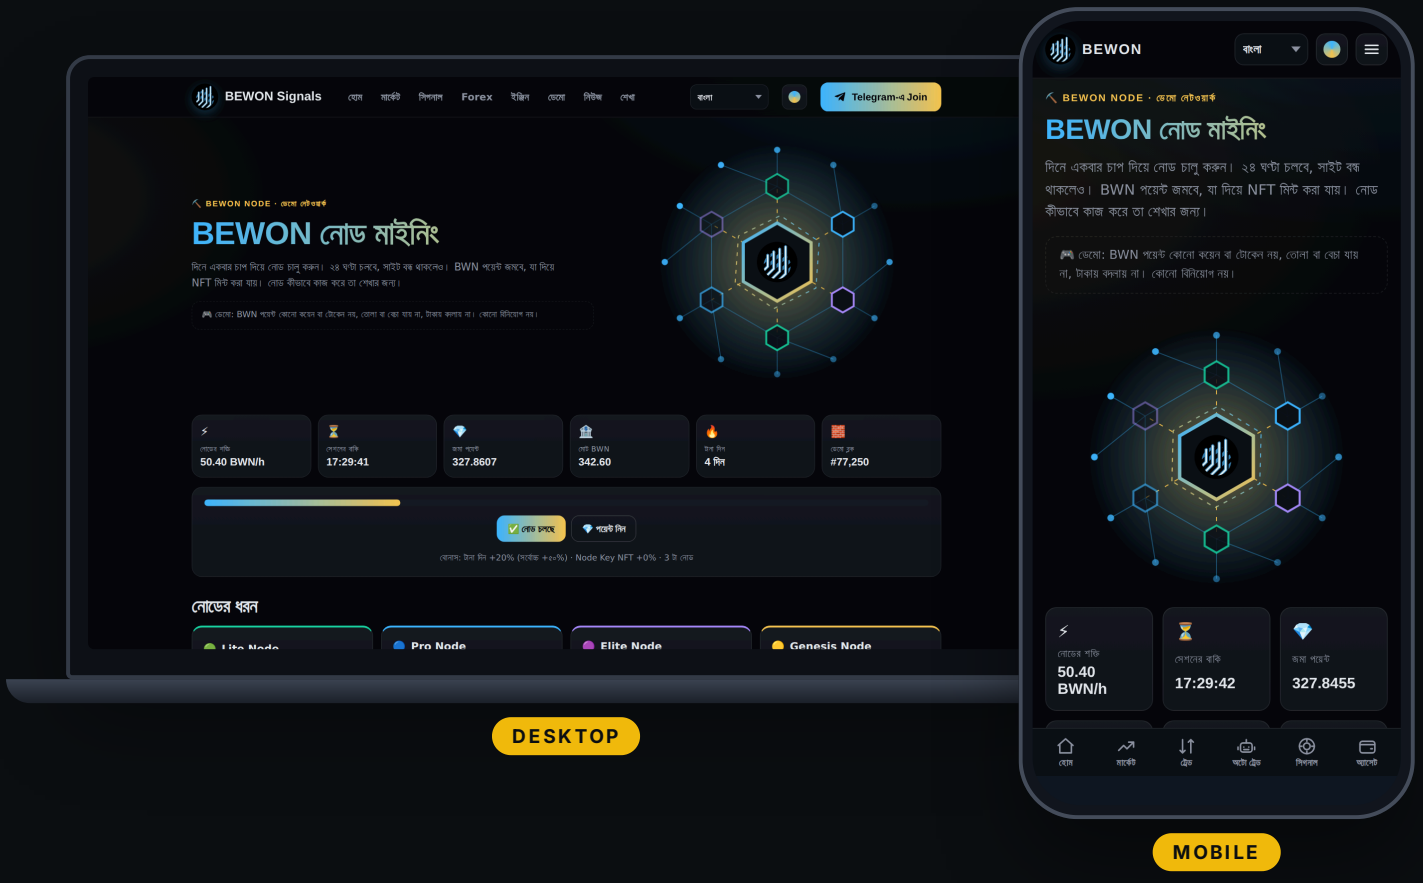

MOBILE

Action	Rule
Buy now	Pays the listed price from the demo balance; the item moves to My NFTs.
Make offer	The demo seller accepts an offer of 92% of the price or more; lower offers are declined and logged.
List for sale	Set any price from 1 USDT. If it is within 15% of fair value, a demo buyer takes it after 10–90 minutes. Higher prices may never sell.
Fees on a sale	Market fee 2.5%. Creator royalty 5% on collection items; none on items you minted yourself.
Sell instantly	Sell to the demo pool at 85% of the collection floor — fast, but usually at a loss, like real 'instant sell' bids.
Limits	Up to 40 NFTs per member; new listings every day.

— 4 · NODE MINING

Start once a day, runs for 24 hours

A node is a computer that checks transactions and keeps a blockchain network running. BEWON Node Mining turns that idea into a simple practice loop: power, sessions, rewards and bonuses — without hardware, electricity or money.

DESKTOP

MOBILE

Part	How it works
Start node	Begins a 24-hour session. It keeps counting with the site closed, because rewards are calculated from time, not from the open page.
Claim points	Moves the points collected so far to the BWN balance. Starting a new session or buying a licence claims automatically.
Streak	Starting on consecutive days raises the streak; a missed day resets it to 1.
Demo block	A counter that grows every 12 seconds to show how blocks follow each other. It is not a real chain.

5 · NODE TYPES & REWARD MATHS

Every number on the table

Type	Price (demo USDT)	BWN per hour	Max per member	Notes
Lite Node	Free	1	1	On for everyone
Pro Node	100	6	5	Demo licence
Elite Node	500	35	3	Demo licence
Genesis Node	2,000	160	1	Demo licence

Formula

Σ (nodes × rate) × **(1 + streak bonus + Node Key bonus)** = **BWN per hour**

Streak bonus	+5% per consecutive day, up to +50% (10 days).
Node Key bonus	+10% per Node Key NFT held, up to +30% (3 keys).
Session length	24 hours. Nothing is earned after a session ends until the next start.
Example	1 Lite + 1 Pro, 4-day streak, no keys: (1 + 6) × 1.20 = 8.4 BWN/h → about 201.6 BWN per full session.

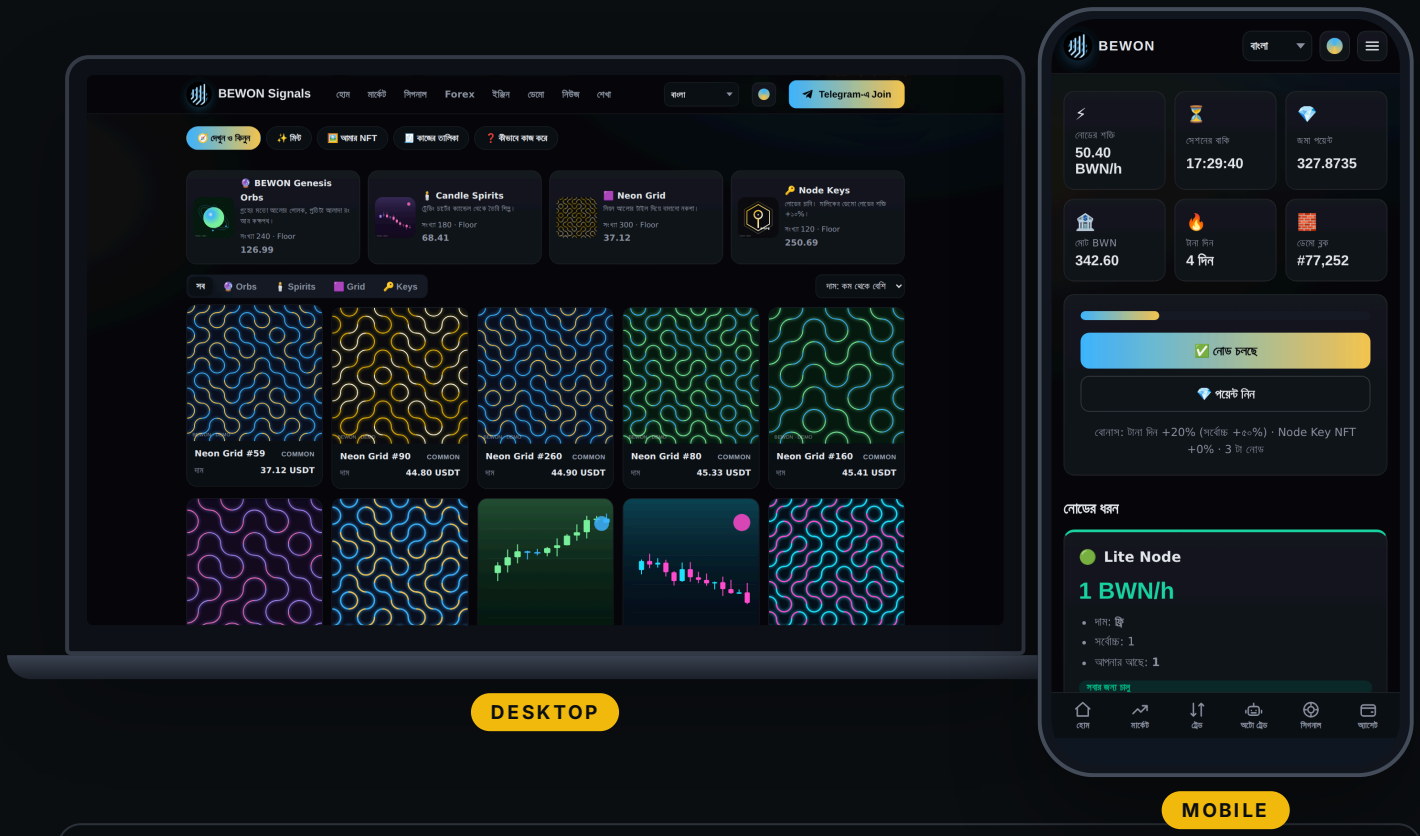

What BWN points can do

- Pay the 50-point mint fee in the NFT Marketplace.
- Nothing else: they cannot be withdrawn, sold, sent or exchanged for money, coins or tokens.

6 · DESIGN

How the modules look and feel

Both modules use BEWON's existing design system so they feel like one product: dark surfaces, the brand gradient for primary actions, rounded cards, and the same layout on desktop and mobile.

DESKTOP

MOBILE

Node network art	A hexagon core with the BEWON mark, six node hexes and twelve outer peers. Lines carry moving dashes only while a session runs; reduced-motion settings stop all animation.
Tier colours	Lite green, Pro blue, Elite violet, Genesis gold — used on cards, node hexes and borders.
NFT cards	Square art, name, rarity colour (grey, blue, violet, gold) and price; cards lift on hover.
Demo marking	Every artwork carries 'BEWON · DEMO'; both pages state that nothing has money value.

7 · SAFETY LESSONS

What members learn to avoid

Risk	Lesson
Seed phrase requests	No real NFT site needs your seed phrase. Anyone asking for it is stealing.
Unlimited approvals	Signing an 'Approve' on an unknown site can let it take every NFT or token in a wallet.
Fake free mints	Links in direct messages and comments are a common way to drain wallets.
Wash trading	Volume can be faked by trading between one owner's own wallets; high volume is not proof of demand.
Buy-a-node schemes	'Buy a node, earn daily' offers that pay old members with new members' money are Ponzi schemes.
Points that 'will be listed'	Promises that points will become a valuable token are a classic hook. BEWON makes no such promise.

These lessons appear on the pages themselves, next to the actions they relate to.

8 · ROADMAP

Phases, not promises

Phase 1

NOW

- ✓ NFT Marketplace in demo mode
- ✓ Mint, list, offer, instant sell
- ✓ Node Mining with sessions and streaks
- ✓ Node Key perk
- ✓ This whitepaper

Phase 2

NEXT

- ✓ Account sync of NFTs and nodes across devices
- ✓ Shared listings between members (still demo)
- ✓ Collection pages and trait filters
- ✓ Node leaderboard (points only)
- ✓ Lessons on real wallets and gas

Phase 3

ONLY IF LAWFUL

- ✓ Any real NFT or node feature would need a registered company, legal review and licences where required
- ✓ Real assets would stay in users' own wallets
- ✓ Nothing from demo carries over automatically

What will not be built

- A sale of BWN points, a token sale or any fundraising from members.
- 'Buy a node, earn daily' income schemes or money-for-referral rewards.
- Custody of members' real NFTs or coins.

9 · DISCLOSURES

Clear limits

- NFTs in BEWON are demo items. They are not recorded on any blockchain and cannot be sold, sent or used outside BEWON.
- BWN points are demo points. They are not a cryptocurrency, security or token, have no money value and will not be converted into one by BEWON.
- Demo prices, buyers and sellers are generated for practice. They are not market data.
- Real NFT markets are thin and volatile; most NFTs lose value. Real node operation needs hardware, power and often locked coins, and can lose money.
- Nothing here is financial advice. Decide yourself, and never invest money you cannot afford to lose.
